CATALOGUE

OF THE

MEDICAL PUBLICATIONS

OF

F. A. DAVIS,

Medical Publisher and Bookseller,

1231 FILBERT STREET, PHILADELPHIA, U.S.A.

BRANCH OFFICES:

45 East Twelfth St., New York, U.S.A.
24 Lakeside Building, 214-220 S. Clark St., Cor. Adams, Chicago, Ill., U.S.A.
1 Kimball House, Wall St., Atlanta, Ga., U.S.A.
427 Sutter St., San Francisco, Cal., U.S.A.
139-143 Oxford St., London, W., England.

SPECIAL NOTICE.

In addition to our own Publications, we keep constantly on hand a large stock of MEDICAL, DENTAL, PHARMACEUTICAL, AND VETERINARY BOOKS. Complete Catalogue (64 pages) furnished free on application.

We give prompt and careful attention to every inquiry, as well as to every order.

ALL NEW BOOKS RECEIVED AS SOON AS PUBLISHED.

REMITTANCES SHOULD BE MADE BY EXPRESS MONEY-ORDER, POST-OFFICE MONEY-ORDER, REGISTERED LETTER, OR DRAFT ON NEW YORK CITY, PHILADELPHIA, BOSTON, OR CHICAGO.

We do not hold ourselves responsible for books sent by mail; to insure safe arrival of books sent to distant parts, the package should be registered. Charges for registering (at purchaser's expense), ten cents for each four pounds or less.

NEW BOOKS IN PRESS AND IN PREPARATION.

BACTERIOLOGICAL DIAGNOSIS—TABULAR AIDS FOR USE IN PRACTICAL WORK. By JAMES EISENBERG, Ph.D., M.D., Vienna. Translated and augmented, with the permission of the author, from the Second German Edition, by NORVAL H. PIERCE, M.D., Surgeon to the Out-Door Department of Michael Reese Hospital; Assistant to Surgical Clinic College of Physicians and Surgeons, Chicago, Ill. In one Octavo volume. IN PRESS.

LECTURES ON ARTISTIC ANATOMY AND THE SCIENCES USEFUL TO THE ARTIST. A series delivered at the Art Institute, Chicago, by S. V. CLEVENGER, M.D., Consulting Physician Reese and Alexian Hospitals; Member numerons American Scientific and Medical Societies; Author of "Spinal Concussion," "Comparative Physiology and Psychology," etc. Illustrated with Seventeen (17) fine full-page Lithographic Plates. In one handsome Quarto volume. IN PRESS.

TWELVE LECTURES ON THE STRUCTURE OF THE CENTRAL NERVOUS SYSTEM. For Physicians and Students. By Dr. LUDWIG EDINGER, Frankfort-on-the-Main. Second Revised Edition, with 133 Illustrations. Translated by WILLIS HALL VITTUM, M.D., St. Paul, Minn. Edited by C. EUGENE RIGGS, A.M., M.D., Professor of Mental and Nervous Diseases, University of Minnesota; Member of the American Neurological Association. In one Octavo volume. IN PRESS.

THE PRINCIPLES OF SURGERY. For Students and Practitioners. By N. SENN, M.D., Ph.D., Attending Surgeon Milwaukee Hospital; Professor of Principles of Surgery in Rush Medical College, Chicago, Ill., etc. In one Octavo volume. Illustrated. IN PREPARATION.

DISEASES OF THE HEART, LUNGS, AND KIDNEYS. By N. S. DAVIS, JR., A.M., M.D., Professor of Principles and Practice of Medicine in the Chicago Medical College, Chicago, Ill., etc. In one neat 12mo volume. No. 5 in the "Physicians' and Students' Ready-Reference Series." IN PREPARATION.

CHILDBED: ITS MANAGEMENT: DISEASES AND THEIR TREATMENT. By WALTER P. MANTON, M.D., Visiting Physician to the Detroit Woman's Hospital; Consulting Gynæcologist to the Eastern Michigan Asylum; President of the Detroit Gynæcological Society; Fellow of the American Society of Obstetricians and Gynæcologists, and of the British Gynæcological Society; Member of the Michigan State Medical Society, etc. In one neat 12mo volume. No. 6 in the "Physicians' and Students' Ready-Reference Series." IN PREPARATION.

Arrangements are being made for volumes upon the **"Eye," "Nose and Throat," "Gynæcology," "Medical Microscopy," "Physiology,"** etc., to follow the above, at intervals, in the "Physicians' and Students' Ready-Reference Series."

The Physicians' and Students' Ready-Reference Series

Includes publications of great valne to students duriug their attendance at college, and to the busy physician in his daily practice. While they in no way attempt to supplant the various Text-Books, *it cannot be doubted that they are necessary to the often overworked student when examination time is approaching*, previous to which, for weeks, but little time can be gained from the lectures in which to make careful and thorough preparation for the examination-room.

Complete synopses of the several important branches, and valuable monographs on various important subjects, are furnished in the publications of this series in such form and arrangement by competent writers as to render them of special practical value to the busy student and also to the physician in active practice. The volumes are neat and convenient in size and shape, and appropriately illustrated with many fine wood-engravings.

See Pages 3, 20, 21, and 27 for those now published, and the upper part of this page for those in preparation.

JUST PUBLISHED—A NEW AND VALUABLE WORK ON

PRACTICAL ELECTRICITY

—IN—

MEDICINE AND SURGERY.

—BY—

G. A. LIEBIG, Jr., Ph.D.,

Assistant in Electricity, Johns Hopkins University; Lecturer on Medical Electricity, College of Physicians and Surgeons, Baltimore; Member of the American Institute of Electrical Engineers, etc.,

—AND—

GEORGE H. ROHÉ, M.D.,

Professor of Obstetrics and Hygiene, College of Physicians and Surgeons, Baltimore; Visiting Physician to Bay View and City Hospitals; Director of the Maryland Maternité; Associate Editor "Annual of the Universal Medical Sciences," etc.

PROFUSELY ILLUSTRATED BY WOOD-ENGRAVINGS AND ORIGINAL DIAGRAMS, AND PUBLISHED IN ONE HANDSOME ROYAL OCTAVO VOLUME OF ABOUT 400 PAGES, BOUND IN EXTRA CLOTH.

NET PRICE, UNITED STATES and CANADA, $2.00, Post-paid; GREAT BRITAIN, 8s. 6d.; FRANCE, 12 fr. 40.

The part on Physical Electricity, written by Dr. Liebig, one of the recognized authorities on the science in the United States, treats fully such topics of interest as Storage Batteries, Dynamos, the Electric Light, and the Principles and Practice of Electrical Measurement in their relations to Medical Practice.

Professor Rohé, who writes on Electro-Therapeutics, discusses at length the recent developments of Electricity in the treatment of stricture, enlarged prostate, uterine fibroids, pelvic cellulitis, and other diseases of the male and female genito-urinary organs.

The applications of Electricity in dermatology, as well as in the diseases of the nervous system, are also fully considered.

THE SECOND VOLUME IN THE PHYSICIANS' AND STUDENTS' READY REFERENCE SERIES.

HAND-BOOK

OF

Materia Medica, Pharmacy, and Therapeutics

By CUTHBERT BOWEN, M.D., B.A.,

Editor of "Notes on Practice."

EXTRACT FROM THE PREFACE.—"While this is essentially a STUDENT'S MANUAL, a large amount of matter has been incorporated which, it is hoped, will render it a useful reference-book to the YOUNG GRADUATE who is just entering on his professional career, and more particularly the individual whose sphere of work demands a more practical acquaintance with pharmaceutical processes than is required of the ordinary city practitioner. Great care has been taken throughout the book to familiarize the student with the best methods of administering the various drugs he will be called upon to use, and with this object a large number of standard prescriptions have been selected from the works of the most eminent authorities, which he can either adopt, with modifications to suit particular cases, or use as models on which to construct his own formulæ."

This excellent manual comprises in its 366 small octavo pages about as much sound and valuable information on the subjects indicated in its title as could well be crowded into the compass. The book is exhaustively and correctly indexed, and of a convenient form. The paper, press-work, and binding are excellent, and the typography (long primer and brevier) is highly to be commended, as opposed to the nonpareil and agate usually used in compends of this sort, and which are destructive to vision and temper alike.—*St. Louis Med. and Surg. Jour.*

In going through it, we have been favorably impressed by the plain and practical suggestions in regard to prescription writing, and the metric system, and the other things which must be known in order to write good and accurate prescriptions.—*Medical and Surgical Reporter.*

Many works claim more in their title-pages than can be verified further on, but the only adverse criticism we can make on this volume is that it does not claim enough.—*Southern California Practitioner.*

The book is one of the very best of its class.—*Columbus Medical Journal.*

This is a very condensed and valuable *resume* of the drugs recognized by the United States Pharmacopœia, and all the officinal and important preparations.—*Southern Medical Record.*

Dr. Bowen's work is a very valuable one indeed, and will be found "to fill a want" beyond a doubt.—*Cincinnati Medical News.*

It is short and concise in its treatment of the subjects, yet it gives sufficient to gain a very correct knowledge of everything that comes under this heading. This is a ready work for the country physician, who must of necessity have a more practical acquaintance with pharmaceutical processes.—*Medical Brief.*

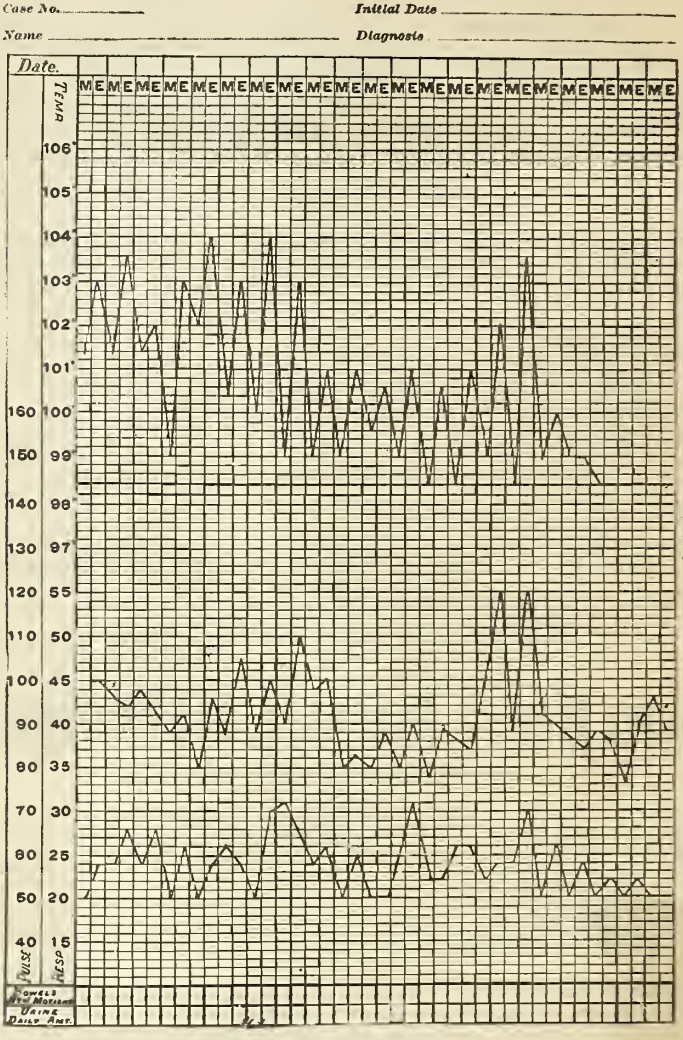
One 12mo volume of 370 pages. Handsomely Bound in Dark-Blue Cloth. Price, post-paid, in the United States and Canada, $1.40, net; in Great Britain, 6s. 6d.; in France, 9 fr. 25.

BASHORE'S IMPROVED CLINICAL CHART.

For the SEPARATE PLOTTING of TEMPERATURE, PULSE, and RESPIRATION.

Designed for the Convenient, Accurate, and Permanent Daily Recording of Cases in Hospital and Private Practice.

By HARVEY B. BASHORE, M.D.



COPYRIGHTED, 1888, BY F. A. DAVIS.

50 Charts, in Tablet Form. Size, 8 x 12 inches.

Price, in the United States and Canada, Post-paid, 50 Cents, Net; Great Britain, 2s. 6d.; France, 3 fr. 60.

The above diagram is a little more than one-fifth (1-5) the actual size of the chart and shows the method of plotting, the upper curve being the Temperature, the middle the Pulse, and the lower the Respiration. By this method a full record of each can easily be kept with but one color ink.

It is so arranged that all practitioners will find it an invaluable aid in the treatment of their patients.

On the back of each chart will be found ample space conveniently arranged for recording "Clinical History and Symptoms" and "Treatment."

By its use the physician will secure such a complete record of his cases as will enable him to review them at any time. Thus he will always have at hand a source of individual improvement and benefit in the practice of his profession, the value of which can hardly be overestimated.

BOOK

ON

The Physician Himself

AND THINGS THAT CONCERN

HIS REPUTATION AND SUCCESS.

BY

D. W. CATHELL, M.D.,
BALTIMORE, MD.

Being the ***NINTH EDITION*** *(Enlarged and Thoroughly Revised) of the "****PHYSICIAN HIMSELF, AND WHAT HE SHOULD ADD TO HIS SCIENTIFIC ACQUIREMENTS IN ORDER TO SECURE SUCCESS.****"*

In One Handsome Octavo Volume of 298 Pages, Bound in Extra Cloth.
Price, Post-paid, in United States and Canada, $2.00, Net; Great Britain, 8s. 6d.; France, 12 fr. 40.

This remarkable book has passed through eight (8) editions in less than five years, has met with the unanimous and hearty approval of the Profession, and is practically indispensable to every young graduate who aims at success in his chosen profession. It has just undergone a thorough revision by the author, who has added much new matter covering many points and elucidating many excellent ideas not included in former editions. This unique book, the only complete one of the kind ever written, will prove of inestimable pleasure and value to the practitioner of many years' standing, as well as to the young physician who needs just such a work to point the way to success.

We give below a few of the many unsolicited letters received by the author, and extracts from reviews in the Medical Journals of the former editions:

"'The Physician Himself' is an opportune and most useful book, which cannot fail to exert a good influence on the *morale* and the business success of the Medical profession."—*From Prof. Roberts Bartholow, Philadelphia, Pa.*

"I have read 'The Physician Himself' with pleasure—delight. It is brimful of medical and social philosophy; every doctor in the land can study it with pleasure and profit. I wish I could have read such a work thirty years ago."—*From Prof. John S. Lynch, Baltimore, Md.*

"'The Physician Himself' interested me so much that I actually read it through at one sitting. It is brimful of the very best advice possible for medical men. I, for one, shall try to profit by it."—*From Prof. William Goodell, Philadelphia.*

"I would be glad if, in the true interest of the profession in 'Old England,' some able practitioner here would prepare a work for us on the same line as 'The Physician Himself.'"—*From Dr. Jukes de Styrap, Shrewsbury, England.*

"I am most favorably impressed with the wisdom and force of the points made in 'The Physician Himself,' and believe the work in the hands of a young graduate will greatly enhance his chances for professional success."—*From Prof. D. Hayes Agnew, Philadelphia, Pa.*

"This book is evidently the production of an unspoiled mind and the fruit of a ripe career. I admire its pure tone and feel the value of its practical points. How I wish I could have read such a guide at the outset of my career!"—*From Prof. James Nevins Hyde, Chicago, Ill.*

"It contains a great deal of good sense, well expressed."—*From Prof. Oliver Wendell Holmes, Harvard University.*

"'The Physician Himself' is useful alike to the tyro and the sage—the neophyte and the veteran. It is a *headlight* in the splendor of whose beams a multitude of our profession shall find their way to success."—*From Prof. J. M. Bodine, Dean University of Louisville.*

"It is replete with good sense and sound philosophy. No man can read it without realizing that its author is a Christian, a gentleman, and a shrewd observer."—*From Prof. Edward Warren (Bey), Chevalier of the Legion of Honor, etc., Paris, France.*

"I have read 'The Physician Himself,' carefully. I find it an admirable work, and shall advise our Janitor to keep a stock on hand in the book department of Bellevue."—*From Prof. William T. Lusk, New York.*

"It must impress all its readers with the belief that it was written by an able and honest member of the profession and for the good of the profession."—*From Prof. W. H. Byford, Chicago, Ill.*

"It is marked with good common sense, and replete with excellent maxims and suggestions for the guidance of medical men."—*From The British Medical Journal, London.*

"We strongly advise every actual and intending practitioner of medicine or surgery to have 'The Physician Himself,' and the more it influences his future conduct the better he will be."—*From The Canada Medical and Surgical Journal, Montreal.*

"We would advise every doctor to well weigh the advise given in this book, and govern his conduct accordingly."—*From The Virginia Medical Monthly.*

AN IMPORTANT PUBLICATION OF GREAT VALUE TO THE MEDICAL AND LEGAL PROFESSIONS.

SPINAL CONCUSSION:

Surgically Considered as a Cause of Spinal Injury, and Neurologically Restricted to a Certain Symptom Group, for which is Suggested the Designation

ERICHSEN'S DISEASE, AS ONE FORM OF THE TRAUMATIC NEUROSES.

BY

S. V. CLEVENGER, M.D.,

CONSULTING PHYSICIAN REESE AND ALEXIAN HOSPITALS; LATE PATHOLOGIST COUNTY INSANE ASYLUM, CHICAGO; MEMBER OF NUMEROUS AMERICAN SCIENTIFIC AND MEDICAL SOCIETIES; COLLABORATOR AMERICAN NATURALIST, ALIENIST AND NEUROLOGIST, JOURNAL OF NEUROLOGY AND PSYCHIATRY, JOURNAL OF NERVOUS AND MENTAL DISEASES; AUTHOR OF "COMPARATIVE PHYSIOLOGY AND PSYCHOLOGY," "ARTISTIC ANATOMY," ETC.

For more than twenty years this subject has occasioned bitter contention in law courts, between physicians as well as attorneys, and in that time no work has appeared that reviewed the entire field judicially until Dr. Clevenger's book was written. It is the outcome of five years special study and experience in legal circles, clinics, hospital and private practice, in addition to twenty years' labor as a scientific student, writer and teacher.

The literature of Spinal Concussion has been increasing of late years to an unwieldy shape for the general student, and Dr. Clevenger has in this work arranged and reviewed all that has been done by observers since the days of Erichsen and those who preceded him. The different and sometimes antagonistic views of many authors are fully given from the writings of Erichsen, Page, Oppenheim, Erb, Westphal, Abercrombie, Sir Astley Cooper, Boyer, Charcot, Leyden, Rigler, Spitzka, Putnam, Knapp, Dana, and many other European and American students of the subject. The small, but important, work of Oppenheim, of the Berlin University, is fully translated, and constitutes a chapter of Dr. Clevenger's book, and reference is made wherever discussions occurred in American medico-legal societies.

There are abundant illustrations, particularly for Electro-diagnosis, and to enable a clear comprehension of the anatomical and pathological relations.

The Chapters are: I. Historical Introduction; II. Erichsen on Spinal Concussion; III. Page on Injuries of the Spine and Spinal Cord; IV. Recent Discussions of Spinal Concussion: V. Oppenheim on Traumatic Neuroses; VI. Illustrative Cases from Original and all other Sources; VII. Traumatic Insanity; VIII. The Spinal Column; IX. Symptoms; X. Diagnosis; XI. Pathology: XII. Treatment: XIII. Medico-legal Considerations.

Other special features consist in a description of modern methods of diagnosis by Electricity, a discussion of the controversy concerning hysteria, and the author's original pathological view that the lesion is one involving the spinal sympathetic nervous system. In this latter respect entirely new ground is taken, and the diversity of opinion concerning the functional and organic natnre of the disease is afforded basis for reconciliation.

Every Physician and Lawyer should own this work.

In one handsome Royal Octavo Volume of nearly 400 pages, with Thirty Wood-Engravings. Net price, in United States and Canada $2.50, post-paid; in Great Britain, IIs. 3d.; in France, 15 fr.

JUST READY—A NEW AND IMPORTANT WORK.

ESSAY
—ON—
MEDICAL PNEUMATOLOGY and AEROTHERAPY:

A PRACTICAL INVESTIGATION OF THE CLINICAL AND THERAPEUTIC VALUE OF THE GASES IN MEDICAL AND SURGICAL PRACTICE, WITH ESPECIAL REFERENCE TO THE VALUE AND AVAILABILITY OF

OXYGEN, NITROGEN, HYDROGEN, AND NITROGEN MONOXIDE.

BY J. N. DEMARQUAY,

Surgeon to the Municipal Hospital, Paris, and of the Council of State; Member of the Imperial Society of Surgery; Correspondent of the Academies of Belgium, Turin, Munich, etc.; Officer of the Legion of Honor; Chevalier of the Orders of Isabella-the-Catholic and of the Conception, of Portugal, etc.

TRANSLATED, WITH NOTES, ADDITIONS, AND OMISSIONS,

BY SAMUEL S. WALLIAN, A.M., M.D.,

Member of the American Medical Association; Ex-President of the Medical Association of Northern New York; Member of the New York County Medical Society, etc.

In one Handsome Octavo Volume of 316 Pages, Printed on Fine Paper, in the Best Style of the Printer's Art, and Illustrated with 21 Wood-Cuts.

	United States.	Canada (duty paid).	Great Britain.	France.
NET PRICE, CLOTH, Post-paid,	**$2.00**	**$2.20**	**8s. 6d.**	**12 fr. 40**
" ½-RUSSIA, "	**3.00**	**3.30**	**13s.**	**18 fr. 60**

For some years past there has been a growing demand for something more satisfactory and more practical in the way of literature on the subject of what has, by common consent, come to be termed "Oxygen Therapeutics." On all sides professional men of standing and ability are turniug their attention to the use of the gaseous elements about us as remedies in disease, as well as sustainers in health. In prosecuting their inquiries, the first hindraunce has been the want of any reliable, or in any degree satisfactory, literature on the subject.

Purged of the much quackery heretofore associated with it, Aerotherapy is uow recognized as a legitimate department of medical practice. Although little noise is made about it, the use of Oxygen Gas as a remedy has increased in this country within a few years to such an extent that in New York City alone the consumption for medical purposes now amounts to more than 300,000 gallons per annum.

This work, translated in the main from the French of Professor Demarquay, contains also a very full account of recent English, German, and American experiences, prepared by Dr. Samuel S. Wallian, of New York, whose experience in this field antedates that of any other American writer on the subject.

Plain Talks on Avoided Subjects.

—BY—

HENRY N. GUERNSEY, M.D.,

Formerly Professor of Materia Medica and Institutes in the Hahnemann Medical College of Philadelphia; Author of Guernsey's "Obstetrics," including the Disorders Peculiar to Women and Young Children; Lectures on Materia Medica, etc.

IN ONE NEAT 16mo VOLUME. BOUND IN EXTRA CLOTH. Price, Post-paid, in United States and Canada, $1.00; Great Britain, 4s. 6d.; France, 6 fr. 20.

This is a little volume designed to convey information upon one of the most important subjects connected with our physical and spiritual well-being, and is adapted to both sexes and all ages and conditions of society; in fact, so broad is its scope that no human being can well afford to be without it, and so comprehensive in its teachings that, no matter how well informed one may be, something can yet be learned from this, and yet it is so plain that any one who can read at all can fully understand its meaning.

The Author, Dr. H. N. Guernsey, has had an unusually long and extensive practice, and his teachings in this volume are the results of his observation and actual experience with all conditions of human life.

His work is warmly indorsed by many leading men in all branches of professional life, as well as by many whose business connections have caused them to be close observers.

The following Table of Contents shows the scope of the book:—

CONTENTS. CHAPTER I.—INTRODUCTORY. II.—THE INFANT. III.—CHILDHOOD. IV.—ADOLESCENCE OF THE MALE. V.—ADOLESCENCE OF THE FEMALE. VI.—MARRIAGE; THE HUSBAND. VII.—THE WIFE. VIII.—HUSBAND AND WIFE. IX.—TO THE UNFORTUNATE. X.—ORIGIN OF THE SEX.

NEW EDITION

Lessons in Gynecology.

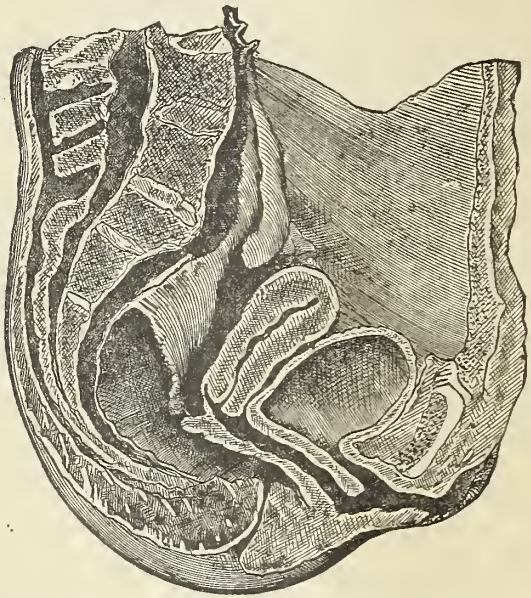
By WILLIAM GOODELL, A.M., M.D., Etc.,

Professor of Clinical Gynecology in the University of Pennsylvania.

With 112 Illustrations. Third Edition, Thoroughly Revised and Greatly Enlarged.
ONE VOLUME, LARGE OCTAVO, 578 PAGES.

This exceedingly valuable work, from one of the most eminent specialists and teachers in gynecology in the United States, is now offered to the profession in a much more complete condition than either of the previous editions. It embraces all the more important diseases and the principal operations in the field of gynecology, and brings to bear upon them all the extensive practical experience and wide reading of the author. It is an indispensable guide to every practitioner who has to do with the diseases peculiar to women.

Fig. 44.



Natural Position of the Womb When the Bladder is Full.
After Briesky.

These lessons are so well known that it is entirely unnecessary to do more than to call attention to the fact of the appearance of the third edition. It is too good a book to have been allowed to remain out of print, and it has unquestionably been missed. The author has revised the work with special care, adding to each lesson such fresh matter as the progress in the art rendered necessary, and he has enlarged it by the insertion of six new lessons. This edition will, without question, be as eagerly sought for as were its predecessors.—*American Journal of Obstetrics.*

The former editions of this treatise were well received by the profession, and there is no doubt that the new matter added to the present issue makes it more useful than its predecessors.—*New York Medical Record.*

His literary style is peculiarly charming. There is a directness and simplicity about it which is easier to admire than to copy. His chain of plain words and almost blunt expressions, his familiar comparison and homely illustrations, make his writings, like his lectures, unusually entertaining. The substance of his teachings we regard as equally excellent.—*Phila. Medical and Surgical Reporter.*

Extended mention of the contents of the book is unnecessary; suffice it to say that every important disease found in the female sex is taken up and discussed in a common-sense kind of a way. We wish every physician in America could read and carry out the suggestions of the chapter on "the sexual relations as causes of uterine disorders—conjugal onanism and kindred sins." The department treating of nervous counterfeits of uterine diseases is a most valuable one.—*Kansas City Medical Index.*

Price, in United States and Canada, Cloth, $5.00; Full Sheep, $6.00. Discount, 20 per cent., making it, net, Cloth, $4.00; Sheep, $4.80. Postage, 27 Cents extra. Great Britain, Cloth, 18s.; Sheep, £1.2s., post-paid, net. France, 30 fr. 80.

AMERICAN RESORTS,

WITH NOTES UPON THEIR CLIMATE.

By BUSHROD W. JAMES, A.M., M.D.,

Member of the American Association for the Advancement of Science, the American Public Health Association, the Pennsylvania Historical Society, the Franklin Institute, and the Academy of Natural Sciences, Philadelphia; the Society of Alaskan Natural History and Ethnology, Sitka, Alaska, etc.

WITH A TRANSLATION FROM THE GERMAN, By Mr. S. KAUFFMANN,

Of those chapters of "Die Klimate der Erde" written by Dr. A. Woeikof, of St. Petersburg, Russia, that relate to North and South America and the islands and oceans contiguous thereto.

In One Octavo Volume. Handsomely Bound in Cloth. Nearly 300 Pages. Price, Post-paid, in U. S. and Canada, $2.00, net. Great Britain, 8s. 6d. France, 12 fr. 40.

This is a unique and valuable work, and useful to physicians in all parts of the country. It is just such a volume as the Medical Profession have stood in need of for many years. We mention a few of the merits it possesses: *First.* List of all the Health Resorts of the country, arranged according to their climate. *Second.* Contains just the information needed by tourists, invalids, and those who visit summer or winter resorts. *Third.* The latest and best large railroad map for reference. *Fourth.* It indicates the climate each one should select for health. *Fifth.* The author has traveled extensively, and most of his suggestions are practical in reference to localities.

Taken altogether, this is by far the most complete exposition of the subject of resorts that has yet been put forth, and it is one that every physician must needs possess intelligent information upon. We predict a large demand for this useful and attractive book.—*Buffalo Med. and Surg. Jour.*

The special chapter on the therapeutics of climate . . is excellent for its precautionary suggestions in the selection of climates and local conditions, with reference to known pathological indicatious and constitutional predispositions.—*The Sanitarian.*

It is arranged in such a manner that it will be of great service to medical men whose duty it often becomes to recommend a health resort.—*N. W. Med. Jour.*

A well-arranged map of the United States serves as the frontispicce of the book; and an almost perfect index is appended, while between the two is an amount of information as to places for the health-seeker that cannot be gotten elsewhere. We most cordially recommend the book to travelers and to the doctor.—*Virginia Med. Monthly.*

This is a work that has long been needed, as there is scarcely a physician who has not had occasion to look up the authorities on climate, elevation, dryness, humidity, etc., etc., of the various health resorts, and has had great difficulty in finding reliable information. It certainly ought, as it deserves, to receive a hearty welcome from the profession.—*Medical Advance.*

The book before us is a very comprehensive volume, giving all necessary information concerning climate, temperature, humidity, sunshine, and indeed everything necessary to be stated for the benefit of the physician or invalid seeking a health resort in the United States.—*Southern Clinic.*

This work is extremely valuable, owing to the liberal and accurate manner in which it gives information regarding the various resorts on the American continent, without being prejudiced in the least in favor of any particular one, but giving all in a fair manner. . . . All physicians need just such a work, for the doctor is always asked to give information on the subject to his patients. Therefore, it should find a place in every physician's library.—*The Med. Brief.*

The author of this admirable work has long made a study of American climate, from the stand-point of a physician, with a view to ascertaining the most suitable localities for the residence of invalids, believing proper climate to be an almost indispensable factor in the treatment, prevention, and cure of many forms of disease. . . . The book evidences careful research and furnishes much useful information not to be found elsewhere.—*Pacific Med. Jour.*

JUST PUBLISHED

RECORD-BOOK OF MEDICAL EXAMINATIONS

For Life Insurance.

Designed by JOHN M. KEATING, M.D.

In examining for Life Insurance, questions are easily overlooked and the answers to them omitted; and, as these questions are indispensable, they must be answered before the case can be acted upon, and the examiner is often put to much inconvenience to obtain this information.

The need has long been felt among examiners for a reference-book in which could be noted the principal points of an examination, and thereby obviate the necessity of a second visit to the applicant when further information is required.

After a careful study of all the forms of examination blanks now used by Insurance Companies, Dr. J. M. Keating has compiled such a record-book which we are sure will fill this long-felt want.

This record-book is small, neat, and complete, and embraces all the principal points that are required by the different companies. It is made in two sizes, viz.: No. 1, covering one hundred (100) examinations, and No. 2, covering two hundred (200) examinations. The size of the book is 7 x 3¾ inches, and can be conveniently carried in the pocket.

DISEASES

OF THE

Heart and Circulation

IN INFANCY AND ADOLESCENCE.

With an Appendix entitled "Clinical Studies on the Pulse in Childhood."

—BY—

JOHN M. KEATING, M.D.,

Obstetrician to the Philadelphia Hospital, and Lecturer on Diseases of Women and Children; Surgeon to the Maternity Hospital; Physician to St. Joseph's Hospital; Fellow of the College of Physicians of Philadelphia, etc.,

—AND—

WILLIAM A. EDWARDS, M.D.,

Instructor in Clinical Medicine and Physician to the Medical Dispensary in the University of Pennsylvania Physician to St. Joseph's Hospital; Fellow of the College of Physicians; formerly Assistant Pathologist to the Philadelphia Hospital, etc.

ILLUSTRATED BY PHOTOGRAPHS AND WOOD-ENGRAVINGS.

About 225 Pages. 8vo. Bound in Cloth. Price, post-paid, in U. S. and Canada, $1.50, net; Great Britain, 6s. 6d.; France, 9 fr. 35.

There are many excellent text-books on children's diseases, but they have failed to give a satisfactory account of the diseases of the heart; and, indeed, as far as known, this work of Keating and Edwards' now presented to the profession is the only systematic attempt that has been made to collect in book form the abundant material which is scattered throughout medical literature in the form of journal articles, clinical lectures, theses, and reports of societies.

The authors have endeavored, in their difficult task, to collect these valuable materials and place them within easy reach of those who are interested in this important subject. That they have succeeded will, we believe, be conceded by all who obtain and make use of their very valuable contribution to this hitherto neglected field of medical literature.

An appendix, entitled "Clinical Studies on the Pulse in Childhood," follows the index in the book, and will, we are sure, be found of much real value to every practitioner of medicine. The work is made available for ready reference by a well-arranged index. We append the table of contents showing the scope of the book:—

—CONTENTS—

CHAPTER I.—The Methods of Study—Instruments—Fœtal Circulation—Congenital Diseases of the Heart—Malformations—Cyanosis.

CHAPTER II.—Acute and Chronic Endocarditis—Ulcerative endocarditis.

CHAPTER III.—Acute and Chronic Pericarditis.

CHAPTER IV.—The treatment of Endo- and Pericarditis—Paracentesis Pericardii—Hydropericardium—Hæmopericardium—Pneumopericardium.

CHAPTER V.—Myocarditis—Tumors, New Growths, and Parasites.

CHAPTER VI.—Valvular Disease: Mitral, Aortic, Pulmonary, and Tricuspid.

CHAPTER VII.—General Diagnosis, Prognosis, and Treatment of Valvular Disease.

CHAPTER VIII.—Endocarditis—Atheroma—Aneurism.

CHAPTER IX.—Cardiac Neuroses—Angina Pectoris—Exophthalmic Goitre.

CHAPTER X.—Diseases of the Blood: Plethora, Anæmia, Chlorosis, Pernicious Anæmia, Leukæmia—Hodgkin's Disease—Hæmophilia. Thrombosis, and Embolism.

INDEX.

APPENDIX.—CLINICAL STUDIES ON THE PULSE IN CHILDHOOD.

Drs. Keating and Edwards have produced a work that will give material aid to every doctor in his practice among children. The style of the book is graphic and pleasing, the diagnostic points are explicit and exact, and the therapeutical resources include the novelties of medicine as well as the old and tried agents.—*Pittsburgh Med. Review.*

A very attractive and valuable work has been given to the medical profession by Drs. Keating and Edwards, in their treatise on the diseases of the heart and circulation in infancy and adolescence, and they deserve the greatest credit for the admirable manner in which they have collected, reviewed, and made use of the immense amount of material on this important subject.—*Archives of Pediatrics.*

The plan of the work is the correct one, viz., the supplementing of the observations of the better class of practitioners by the experience of those who have given the subject systematic attention.—*Medical Age.*

It is not a mere compilation, but a systematic treatise and bears evidence of considerable labor and observation on the part of the authors. Two fine photographs of dissections exhibit mitral stenosis and mitral regurgitation there are also a number of wood-cuts.—*Cleveland Medical Gazette.*

As the works upon diseases of children give little or no attention to diseases of the heart, this work of Drs. Keating and Edwards will supply a want. We think that there will be no physician, who takes an interest in the affections of young folks, who will not wish to consult it.—*Cincinnati Med. News.*

The work takes up, in an able and scientific manner diseases of the heart in children. This is a part of the field of medical science which has not been cultivated to the extent that the importance of the subject deserves.—*Canada Lancet.*

PERPETUAL CLINICAL INDEX

—TO—

MATERIA MEDICA, CHEMISTRY, AND PHARMACY CHARTS.

By A. H. KELLER, Ph.G., M.D.

Consisting of (1) the "Perpetual Clinical Index," an oblong volume, 9x6 inches, neatly bound in extra Cloth; (2) a Chart of "Materia Medica," 32x44 inches, mounted on muslin, with rollers; (3) a Chart of "Chemistry and Pharmacy," 32x44 inches, mounted on muslin, with rollers.

	United States.	Canada (duty paid).	Great Britain.	France.
Net Price for the Complete Work,	**$5.00**	**$5.50**	**£1.1s.**	**30 fr. 30**

Read the Following Description and Explanation of the Work:

In presenting the objects and advantages of these Charts and "Perpetual Clinical Index" it becomes necessary to state that the Author's many years' experience as a physician and Pharmacist enables him to produce, in terse language, a volume of facts that must be of inestimable value to the busy physician and pharmacist, or to any student of either profession. He has endeavored to describe all that have borne investigation up to date.

The system will prove to be of great value in this, that so little labor will be required to add new investigation as fast as may be gathered from new books, journals, etc. The classification is alphabetical and numerical in arrangement, and serves so to unite the various essentials of Botany, Chemistry, and Materia Medica, that the very thought of the one will readily associate the principal properties and uses, as well as its origin.

The **"MATERIA MEDICA" CHART,** in the first place, aids at a glance: 1st, Botanical or U. S. P. Name; 2d, The Common Name; 3d, Natural Order; 4th, Where Indigenous; 5th, Principal Constituent; 6th, Part Used—herbs, leaves, flowers, roots, barks, etc.; 7th, Medicinal Properties—mainly considered; 8th, The Dose—medium and large.

On this Chart there are 475 first names; Section A. is numbered from 1 to 59, each section commencing with the capital letter, and having its own numbers on both left-hand and right-hand columns, to prevent mistakes in lining out, all in quite large type. In the centre of the Chart, occupying about 6 inches in width, is a term index of common names. In the second column of Chart, like this:

ACONITE LEAVES, ... 4 A.

Then by reference to 4 A in first column, you there find the Botanical or U. S. P. Name. On this Chart is also found a brief definition of the terms used, under the heading "Medicinal Properties."

The **"CHEMISTRY" CHART** takes in regular order the U. S. Pharmacopœia Chemicals, with the addition of many new ones, and following the name, the Chemical Formula, the Molecular Weight, and next the Origin. This is a brief but accurate description of the essential points in the manufacture: The Dose, medium and large; next, Specific Gravity; then, whether Salt or Alkaloid; next, Solubilities, by abbreviation, in Water, Alcohol, and Glycerine, and blank columns for solubilities, as desired.

Alkaloids and Concentrations are tabulated with reference numbers for the Perpetual Clinical Index, giving Medicinal Properties, Minute Dose and Large Dose. For example, ALKALOIDS AND CONCENTRATIONS:

A.	MEDICINAL PROPERTIES.	MINUTE DOSE.	LARGE DOSE.
(a) Aconitine.	Narcotic and Apyretic.	1-500 gr.	1-16 gr.

Following this, Preparations of the Pharmacopœia, each tabulated. For example:

TINCTURAL.

TINCTURA.	DRUG.	AMOUNT.	ALCOHOL.	DOSE.
* Aconiti.	{ Aconite. { Tartaric Acid, 60 † P.	5½ oz. to 24 gr.	100	1 to 3 drops.

* 60 Fineness of Powder as per U. S. P.
† P. Macerate 24 hours. Percolate, adding Menstruum to complete (1) pint tincture.

They are all thus abbreviated, with a ready reference head-note.

Next, Thermometers, Metric Table of Weights, Helps to the Study of Chemistry, Examples in Working Atomic Molecular Formulæ. Next, Explanation of Terms Used in Columns of Solubilities, List of Most Important Elements Now in Use, and Definitions or Terms Frequently Used in Chemistry and Pharmacy.

The **"PERPETUAL CLINICAL INDEX"** is a book 6 by 9 inches, and one-half inch thick. It contains 135 pages, divided as follows (opposite pages blank):

The Index to Chemistry Chart occupies two pages; Explanations, Abbreviations, etc., forty pages, with diseases, and with an average of ten references to each disease, leaving room for about forty more remedies for each disease. The numbers refer to the remedies used in the diseases by the most celebrated physicians and surgeons, and the abbreviations to the manner in which they are used. Eight pages, numbered and bracketed, for other diseases not enumerated. The Materia Medica, Explanations, Abbreviations, and Remedies suggested for, occupy twenty-six pages. For Abbreviated Prescriptions, seventeen blank pages. Then the Index to Alkaloids and Concentrations. These, already enumerated, with their reference, number six blank tabulated pages, for noting any new Alkaloids and Concentrations. Then the Chemistry Index, giving the same number as on Chart, with Name, Doses, Specific Gravity, Salt or Alkaloid in the same line, as for example:

NAME.	DOSES.	SPECIFIC GRAVITY.	SALT OR ALKALOID.	MEMORANDA.

This Memoranda place is for Physicians' or Pharmacists' reference notes; and with the addition of several tabulated blank pages, in which to add any new chemical, with doses, etc. The remaining sixteen pages for Materia Medica Index, leaving blanks following each other for new names and reference numbers.

To show the ready and permanent use of the "Perpetual Clinical Index" of the "Chemistry" and "Pharmacy" Charts or Index in the book, suppose the Physician reads in a book or journal that Caffeine Citras is useful in the disease Chorea, and he wishes to keep a permanent record of that, he refers to the Chart, and if it does not already appear there, it can be placed opposite and numbered, and thereafter used for reference. But we find its permanent number is No. 99, so he will write down in the line left blank for future use in his book, in line already used, running parallel with other reference numbers in Chorea, the No. 99, and immediately under he can use the abbreviation in the manner in which it is given. Though years may have passed, he can in a moment, by referring there, see that No. 99 is good for Chorea. If failing to remember what No. 99 is, he glances at the Chart or Index. He sees that No. 99 is Caffeine Citras, and he there learns its origin and dose and solubility, and in a moment an intelligent prescription can be constructed.

New Edition of an Important and Timely Work Just Published.

Electricity in the Diseases of Women,

With Special Reference to the Application of Strong Currents.

By G. BETTON MASSEY, M.D.,

Physician to the Gynecological Department of Howard Hospital; Late Electro-Therapeutist to the Philadelphia Orthopædic Hospital and Infirmary for Nervous Diseases; Member of the American Neurological Ass'n, of the Philadelphia Neurological Society, of the Franklin Institute, etc.

Second Edition. Revised and Enlarged.

WITH NEW AND ORIGINAL WOOD-ENGRAVINGS. HANDSOMELY BOUND IN CLOTH. OVER 200 PAGES.

12mo. Price, in United States and Canada, $1.50, net, post-paid.

In Great Britain, 6s. 6d. In France, 9 fr. 35.

This work is presented to the profession as the most complete treatise yet issued on the electrical treatment of diseases of women, and is destined to fill the increasing demand for clear and practical instruction in the handling and use of strong currents after the recent methods first advocated by Apostoli. The whole subject is treated from the present stand-point of electric science *with new and original illustrations*, the thorough studies of the author and his wide clinical experience rendering him an authority upon electricity itself and its therapeutic applications. The author has enhanced the practical value of the work by including *the exact details* of treatment and results in a number of cases taken from his private and hospital practice.

FIG. 15.—AUTHOR'S FIBROID SPEAR.

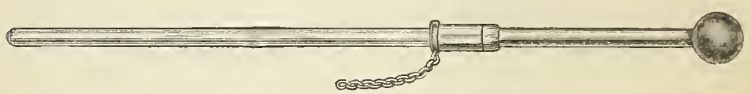

FIG. 18.—BALL ELECTRODE FOR ADMINISTERING FRANKLINIC SPARKS.

CONTENTS

CHAPTER I, Introductory; II, Apparatus required in gynecological applications of the galvanic current III, Experiments illustrating the physical qualities of galvanic currents; IV, Action of concentrated galvanic currents on organized tissues; V, Intra-uterine galvano-chemical cauterization; VI, Operative detail of pelvic electro-puncture; VII, The faradic current in gynecology; VIII, The franklinic current in gynecology; IX, Non-caustic vaginal, urethral, and rectal applications; X, General percutaneous applications in the treatment of nervous women; XI, The electrical treatment of fibroid tumors of the uterus; XII, The electrical treatment of uterine hemorrhage; XIII, The electrical treatment of subinvolution; XIV, The electrical treatment of chronic endometritis and chronic metritis; XV, The electrical treatment of chronic diseases of the uterus and appendages; XVI, Electrical treatment of pelvic pain; XVII, The electric treatment of uterine displacements; XVIII, The electrical treatment of extra-uterine pregnancy; XIX The electrical treatment of certain miscellaneous conditions; XX, The contra-indications and limitations to the use of strong currents.

An Appendix and a *Copious Index*, including the definitions of terms used in the work, conclude the book.

The author gives us what he has seen, and of which he is assured by scientific study is correct. . . . . We are certain that this little work will prove helpful to all physicians who desire to use electricity in the management of the diseases of women.—*The American Lancet.*

To say that the author is rather conservative in his ideas of the curative powers of electricity is only another way of saying that he understands his subject thoroughly. The mild enthusiasm of our author is unassailable, because it is founded on science and reared with experience.—*The Medical Analectic.*

The work is well written, exceedingly practical, and can be trusted. We commend it to the profession."—*Maryland Medical Journal.*

The book is one which should be possessed by every physician who treats diseases of women by electricity.—*The Brooklyn Medical Journal.*

The departments of electro-physics, pathology, and electro-therapeutics are thoroughly and admirably considered, and by means of good wood-cuts the beginner has before his eye the exact method of work required.—*The Medical Register.*

"The author of this little volume of 210 pages ought to have added to its title, "and a most happy dissertation upon the methods of using this medicinal agent;" for the first 100 pages he has contrived to describe the *technique* of electrization in as clear and happy a manner as the author has ever succeeded in doing, and for this part of the book alone it is almost priceless to the beginner in the treatment with this agent. . . . . The little book is worthy the perusal of every one at all interested in the subject of electricity in medicine.—*The Omaha Clinic.*

The treatment of fibroid tumor of the uterus will perhaps, interest the profession more generally than any other question. This subject has been accorded ample space. The method of treatment in many cases has been recited in detail, the results in every instance reported being beneficial, and in many curative.—*Pacific Med. Journal*

MEARS'

PRACTICAL SURGERY.

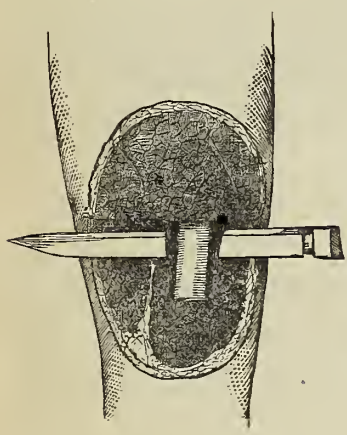
By J. EWING MEARS, M.D.,

Lecturer on Practical Surgery and Demonstrator of Surgery in Jefferson Medical College; Professor of Anatomy and Clinical Surgery in the Pennsylvania College of Dental Surgery, etc.

With 490 Illustrations. Second edition, revised and enlarged. 794 pp. 12mo.

PRICE, IN UNITED STATES AND CANADA: CLOTH, $3.00. DISCOUNT, 20 PER CENT., MAKING IT, NET, $2.40; POSTAGE, 20 CENTS EXTRA. GREAT BRITAIN, 13s. FRANCE, 18 fr. 75.

MEARS' PRACTICAL SURGERY includes chapters on Surgical Dressings, Bandaging, Fractures. Dislocations, Ligature of Arteries, Amputations, Excisions of Bones and Joints. This work gives a complete account of the methods of antiseptic surgery. The different agents used in antiseptic dressing, their methods of preparation, and their application in the treatment of wounds are fully described. With this work as a guide it is possible for every surgeon to practice antiseptic surgery. The great advances made in the science and art of surgery are largely due to the introduction of antiseptic methods of wound treatment, and it is incumbent upon every progressive surgeon to employ them.



An examination of this work will show that it is thoroughly systematic in its plan, so that it is not only useful to the practitioner, who may be called upon to perform operations, but of great value to the student in his work in the *surgical room*, where he is required to apply bandages and fracture dressings, and to perform operations upon the cadaver. The experience of the author, derived from many years' service as a teacher (private and public) and practitioner, has enabled him to present the topics discussed in such a manner as to fully meet the needs of both practitioners and students.

It is full of common sense, and may be safely taken as a guide in the matters of which it treats. It would be hard to point out all the excellences of this book. We can heartily recommend it to students and to practitioners of surgery.—*American Journal of the Medical Sciences.*

We do not know of any other work which would be of greater value to the student in connection with his lectures in this department.—*Buffalo Medical and Surgical Journal.*

The work is excellent. The student or practitioner who follows it intelligently cannot easily go astray.—*Journal American Medical Asso'n.*

We cannot speak too highly of the volume under review.—*Canada Med. and Surg. Jour.*

The space devoted to fractures and dislocations—by far the most difficult and responsible part of surgery—is ample, and we notice many new illustrations explanatory of the text.—*North Carolina Medical Journal.*

It is one of the most valuable of the works of its kind.—*New Orleans Med. and Surg. Jour.*

AN ENTIRELY NEW PHYSICIAN'S VISITING LIST.

THE

MEDICAL BULLETIN VISITING LIST

—OR—

PHYSICIAN'S CALL RECORD.

ARRANGED UPON AN ORIGINAL AND CONVENIENT MONTHLY AND WEEKLY PLAN FOR THE DAILY RECORDING OF PROFESSIONAL VISITS.

Frequent Rewriting of Names Unnecessary.

THIS VISITING LIST is arranged upon a plan best adapted to the most convenient use of all physicians, and embraces a new feature in recording daily visits not found in any other list, consisting of STUB OR HALF LEAVES IN THE FORM OF INSERTS, a glance at which will suffice to show that as the first week's record of visits is completed the next week's record may be made by simply turning over the stub-leaf, without the necessity of re writing the patients' names. This is done until the month is completed, and the physician has kept his record just as complete in every detail of VISIT, CHARGE, CREDIT, etc., as he could have done had he used any of the old-style visiting lists, and has also SAVED himself three-fourths of the time and labor formerly required in transferring names EVERY week. There are no intricate rulings; everything is easily and quickly understood; not the least amount of time can be lost in comprehending the plan, for it is acquired at a glance.

The Three Different Styles Made.

The ***No. 1 Style*** of this List provides ample space for the DAILY record of seventy (70) different names each month for an entire year (two full pages, thirty-five [35] names to a page, being allowed to each month), so that its size is sufficient for an ordinary practice; but for physicians who prefer a List that will accommodate a larger practice we have made a ***No. 2 Style,*** which provides ample space for the daily record of ONE HUNDRED AND FIVE DIFFERENT NAMES (105) each month for an entire year (three full pages being allowed to each month), and for physicians who may prefer a Pocket Record Book of less thickness than either of these styles we have made a ***No. 3 Style,*** in which "The Blanks for the Recording of Visits In" have been made into removable sections. These sections are very thin, and are made up so as to answer in full the demand of the largest practice, each section providing ample space for the DAILY RECORD OF TWO HUNDRED AND TEN (210) DIFFERENT NAMES for one month; or one hundred and five (105) different names daily each month for two months; or seventy (70) different names daily each month for three months; or thirty-five (35) different names daily each month for six months. Four sets of these sections go with each copy of No. 3 Style.

Special Features Not Found in Any Other List.

In this No. 3 STYLE the PRINTED MATTER, and such matter as the BLANK FORMS FOR ADDRESSES OF PATIENTS, Obstetric Record, Vaccination Record, Cash Account, Births and Deaths Records, etc., are fastened permanently in the back of the book, thus reducing its thickness. The addition of one of these removable sections does not increase the size quite an eighth of an inch. This brings the book into such a small compass that no one can object to it on account of its thickness, as its bulk

is VERY MUCH LESS than that of any visiting list ever published. Every physician will at once understand that as soon as a section is full it can be taken out, filed away, and another inserted without the least inconvenience or trouble.

This Visiting List contains a Calendar for the last six months of last year, all of this, and next year; Table of Signs to be used in Keeping Accounts; Dr. Ely's Obstetrical Table; Table of Calculating the Number of Doses in a given ℞, etc., etc.; for converting Apothecaries' Weights and Measures into Grammes; Metrical Avoirdupois and Apothecaries' Weights; Number of Drops in a Fluidrachm; Graduated Doses for Children; Graduated Table for Administering Laudanum; Periods of Eruption of the Teeth; The Average Frequency of the Pulse at Different Ages in Health; Formula and Doses of Hypodermic Medication; Use of the Hypodermic Syringe; Formulæ and Doses of Medicine for Inhalation; Formulæ for Suppositories for the Rectum; The Use of the Thermometer in Disease; Poisons and their Antidotes; Treatment of Asphyxia; Anti-Emetic Remedies; Nasal Douches; Eye-Washes.

Most Convenient Time- and Labor- Saving List Issued.

It is evident to every one that this is, beyond question, the best and most convenient time- and labor- saving Physicians' Record Book ever published. Physicians of many years' standing and with large practices pronounce this *the Best List they have ever seen.* It is handsomely bound in fine, strong leather, with flap, including a pocket for loose memoranda, etc., and is furnished with a Dixon lead-pencil of excellent quality and finish. It is compact and convenient for carrying in the pocket. Size, 4 x 6⅞ inches.

IN THREE STYLES—NET PRICES, POST-PAID.

	U. S. and Canada.	Great Britain.	France.
No. 1. Regular Size, for 70 patients daily each month for one year,	$1.25	5s. 3.	7 fr. 75
No. 2. Large Size, for 105 patients daily each month for one year,	1.50	6s. 6.	9 fr. 35
No. 3. In which "The Blanks for Recording Visits in" are in removable sections, as described above, - - - - -	1.75	7s. 3.	12 fr. 20

EXTRACTS FROM REVIEWS.

"While each page records only a week's visits, yet by an ingenious device of half leaves the names of the patients require to be written but once a month, and a glance at an opening of the book shows the entire visits paid to any individual in a month. It will be found a great convenience."—*Boston Medical and Surgical Journal.*

"Everything about it is easily and quickly understood."—*Canadian Practitioner.*

"Of the many visiting lists before the profession, each has some special feature to recommend it. This list is very ingeniously arranged, as by a series of narrow leaves following a wider one, the name of the patient is written but once during the month, while the account can run for thirty-one days, space being arranged for a weekly debit and credit summary and for special memoranda. The usual pages for cash account, obstetrical record, addresses, etc., are included. A large amount of miscellaneous information is presented in a condensed form." — *Occidental Medical Times.*

"It is a monthly instead of a weekly record, thus obviating the transferring of names oftener than once a month. There is a Dr. and Cr. column following each week's record, enabling the doctor to carry a patient's account for an indefinite time, or until he is discharged, with little trouble."—*Indiana Medical Journal.*

"Accounts can begin and end at any date. Each name can be entered for each day of every month on the same line. To accomplish this, four leaves, little more than one-third as wide as the usual leaf of the book, follow each page. Opposite is a full page for the recording of special memoranda. The usual accompaniments of this class of books are made out with care and fitness."—*The American Lancet.*

"This is a novel list, and an unusually convenient one."—*Journal of the Amer. Med. Assoc.*

"This new candidate for the favor of physicians possesses some unique and useful points. The necessity of rewriting names every week is obviated by a simple contrivance in the make-up of its pages, thus saving much valuable time, besides reducing the bulk of the book."—*Buffalo Medical and Surgical Journal.*

"This list is an entirely new departure, and on a plan that renders posting rapid and easy. It is just what we have often wished for, and really fills a long-felt want."—*The Medical Waif.*

"It certainly contains the largest amount of practical knowledge for the medical practitioner in the smallest possible volume, besides enabling the poorest accountant to keep a correct record, and render a correct bill at a moment's notice."—*Medical Chips.*

HAND-BOOK OF ECLAMPSIA;

OR,

Notes and Cases of Puerperal Convulsions.

BY

E. MICHENER, M.D., J. H. STUBBS, M.D., R. B. EWING, M.D.,
B. THOMPSON, M.D., S. STEBBINS, M.D.

Price, in United States and Canada, Bound in Cloth, 16mo, Net, 75 Cents; in Great Britain, 3 Shillings; in France, 4 fr. 20.

In our medical colleges the teachers of Obstetrics *dwell* upon the use of blood-letting (phlebot[illegible] cases of puerperal convulsions, and to this method Dr. Michener and his fellows give their unqualifie[illegible] support—not to take a prescribed number of ounces, but to *bleed for effect*, and *from a large orific[illegible]* is plainly and admirably set forth in his book. To bleed requires a cutting instrument,—not neces[illegible] lancet,—for Dr. M. states how in one case a pocket-knife was used and the desired effect produced.

Let the young physician gather courage from this little book, and let the more experienced gi[illegible] te[illegible]mony to confirm its teaching.

We have always thought that this treatment was indorsed, approved, and practiced by physicians generally; and to such as doubt the efficacy of blood-letting we would commend this little volume.—*Southern Clinic.*

The authors are seriously striving to restore the "lost art" of blood-letting, and we must comm[illegible] modesty of their endeavor.—*North Carolina Med.*

The cases were ably analyzed, and this plea f[illegible] section should receive the most attentive considerat[illegible] obstetricians.—*Medical and Surgical Reporter.*

JUST READY.

A MANUAL OF INSTRUCTION

FOR GIVING

Swedish Movement and Massage Treatment.

BY

PROF. HARTVIG NISSEN,

Director of the Swedish Health Institute, Washington, D.C.; Late Instructor in Physical Cultur[illegible] Gymnastics at the Johns Hopkins University, Baltimore, Md.; Author of "Health by Exercise without Apparatus."

ILLUSTRATED WITH 29 ORIGINAL WOOD-ENGRAVINGS.

In One 12mo Volume of 128 Pages. Neatly Bound in Cloth. Price post-paid, in United States and Canada, Net, $1.00; in Great Britain, 4s. 3d.; in France, 6 fr. 20.

This is the only publication in the English language treating this very impor[illegible] subject in a practical manner. Full instructions are given regarding the mod[illegible] of applying

The Swedish Movement and Massage Treatment

in various diseases and conditions of the human system with the greatest degre[illegible] effectiveness. Professor Nissen is the best authority in the United States upon this p[illegible]tical phase of this subject, and his book is indispensable to every physician who wish[illegible] *know how* to use these valuable handmaids of medicine.

This manual is valuable to the practitioner, as it contains a terse description of a subject but too little understood in this country. . . . . The book is got up very creditably.—*N. Y. Med. Jour.*

The present volume is a modest account of the application of the Swedish Movement and Massage Treatment, in which the technique of the various procedures are clearly stated as well as illustrated in a very excellent manner. —*North American Practitioner.*

This little manual seems to be written by an expert, and to those who desire to know the details connected with the Swedish Movement and Massage we commend book.—*Practice.*

This attractive little book presents the subject in a practical shape, and makes it possible for every physic[illegible] understand at least how it is applied, if it does not giv[illegible] dexterity in the art of its application. He can cert[illegible] acquire dexterity by following the directions so plainl[illegible] vised in this book.—*Chicago Med. Times.*

It is so practical and clear in its demonstrations if you wish a work of this nature you cannot do better peruse this one.—*Medical Brief.*

JUST READY—THE LATEST AND BEST PHYSICIAN'S ACCOUNT-BOOK EVER PUBLISHED.

THE PHYSICIAN'S ALL-REQUISITE TIME- AND LABOR-SAVING Account-Book:

BEING A LEDGER AND ACCOUNT-BOOK FOR PHYSICIANS' USE, MEETING ALL THE REQUIREMENTS OF THE LAW AND COURTS.

DESIGNED BY

WILLIAM A. SEIBERT, M.D.,

Of Easton, Pa.

PROBABLY no class of people lose more money through carelessly kept accounts and overlooked or neglected bills than physicians. Often detained at the bedside of the sick until late at night, or deprived of even a modicum of rest, it is with great difficulty that he spares the time or puts himself in condition to give the same care to his own financial interests that a merchant, a lawyer, or even a farmer devotes. It is then plainly apparent that a system of bookkeeping and accounts that, without sacrificing accuracy, but, on the other hand, ensuring it, at the same time relieves the keeping of a physician's book of half their complexity and two-thirds the labor, is a convenience which will be eagerly welcomed by thousands of overworked physicians. Such a system has at last been devised, and we take pleasure in offering it to the profession in the form of THE PHYSICIAN'S ALL-REQUISITE TIME- AND LABOR- SAVING ACCOUNT-BOOK.

There is no exaggeration in stating that this Account-Book and Ledger reduces the labor of keeping your accounts more than one-half, and at the same time secures the greatest degree of accuracy. We may mention a few of the superior advantages of THE PHYSICIAN'S ALL-REQUISITE TIME- AND LABOR- SAVING ACCOUNT-BOOK, as follow:—

First—Will meet all the requirements of the law and courts.
Second—Self-explanatory; no cipher code.
Third—Its completeness without sacrificing anything.
Fourth—No posting; one entry only.
Fifth—Universal; can be commenced at any time of year, and can be continued indefinitely until every account is filled.
Sixth—Absolutely no waste of space.
Seventh—One person must needs be sick every day of the year to fill his account, or might be ten years about it and require no more than the space for one account in this ledger.
Eighth—Double the number and many times more than the number of accounts in any similar book; the 300-page book contains space for 900 accounts, and the 600-page book contains space for 1800 accounts.
Ninth—There are no smaller spaces.
Tenth—Compact without sacrificing completeness; every account complete on same page—a decided advantage and recommendation.
Eleventh—Uniform size of leaves.
Twelfth—The statement of the most complicated account is at once before you at any time of month or year—in other words, the account itself as it stands is its simplest statement.
Thirteenth—No transferring of accounts, balances, etc.

To all physicians desiring a quick, accurate, and comprehensive method of keeping their accounts, we can safely say that no book as suitable as this one has ever been devised.

NET PRICES, SHIPPING EXPENSES PREPAID.

PHYSICIANS' INTERPRETER

IN FOUR LANGUAGES.

(ENGLISH, FRENCH, GERMAN, AND ITALIAN.)

Specially Arranged for Diagnosis by M. von V.

The object of this little work is to meet a need often keenly felt by the busy physician, namely, the need of some quick and reliable method of communicating intelligibly with patients of those nationalities and languages unfamiliar to the practitioner. The plan of the book is a systematic arrangement of questions upon the various branches of Practical Medicine, and each question is so worded that the only answer required of the patient is merely YES or NO. The questions are all numbered, and a complete Index renders them always available for quick reference. The book is written by one who is well versed in English, French, German, and Italian, being an excellent teacher in all those languages, and who has also had considerable hospital experience.

Bound in Full Russia Leather, for Carrying in the Pocket. (Size, 5 x 2¾ Inches.) 206 Pages. Price, post-paid, in United States and Canada, $1.00, net; Great Britain, 4s. 6d.; France, 6 fr. 20.

To convey some idea of the scope of the questions contained in the Physicians' Interpreter, we append the Index :—

	NOS.
General health	1– 50
Special diet	31– 47
Age of patient	52– 62
Necessity of patients undergoing an operation	63– 70
Office hours	71– 77
Days of the week	78– 84
Patient's history: hereditary affections in his family; his occupation; diseases from his childhood up	85–130
Months of the year	106–117
Seasons of the year	118–121
Symptoms of typhoid fever	131–158
Symptoms of Bright's disease	159–168
Symptoms of lung diseases	169–194 and 311–312
Vertigo	195–201
The eyes	201–232
Paralysis and rheumatism	236–260
Stomach complaints and chills	261–269
Falls and fainting spells	271–277
How patient's illness began, and when patient was first taken sick	278–279
Names for various parts of the body	283–299
The liver	300–301
The memory	304–305
Bites, stings, pricks	314–316
Eruptions	317–318
Previous treatment	319
Symptoms of lead-poisoning	320–324
Hemorrhages	325–328
Burns and sprains	330–331
The throat	332–335
The ears	336–339
General directions concerning medicines, baths, bandaging, gargling, painting swelling, etc	340–373
Numbers	pages 202–204

The work is well done, and calculated to be of great service to those who wish to acquire familiarity with the phrases used in questioning patients. More than this, we believe it would be a great help in acquiring a vocabulary to be used in reading medical books, and that it would furnish an excellent basis for beginning a study of any one of the languages which it includes.—*Medical and Surgical Reporter.*

Many other books of the same sort, with more extensive vocabularies, have been published, but, from their size, and from their being usually devoted to equivalents in English and one other language only, they have not had the advantage which is pre-eminent in this—convenience. It is handsomely printed, and bound in flexible red leather in the form of a diary. It would scarcely make itself felt in one's hip-pocket, and would insure its bearer against any ordinary conversational difficulty in dealing with foreign-speaking people, who are constantly coming into our city hospitals.—*New York Medical Journal.*

In our larger cities, and in the whole Northwest, the physician is constantly meeting with immigrant patients, to whom it is difficult for him to make himself understood, or to know what they say in return. This difficulty will be greatly obviated by use of this little work.—*The Physician and Surgeon.*

The phrases are well selected, and one might practice long without requiring more of these languages than this little book furnishes.—*Phila. Medical Times.*

How often the physician is called to attend those with whom the English language is unfamiliar, and many physicians are thus deprived of the means, save through an interpreter, of arriving at a correct knowledge on which to base a diagnosis. An interpreter is not always at hand, but with this pocket interpreter in your hand you are able to ask all the questions necessary, and receive the answer in such manner that you will be able to fully comprehend. —*The Medical Brief.*

This little volume is one of the most ingenious aids to the physician which we have seen. We heartily commend the book to any one who, being without a knowledge of the foreign languages, is obliged to treat those who do not know our own language.—*St. Louis Courier of Medicine.*

It will rapidly supersede, for the practical use of the doctor who cannot take the time to learn another language, all other suggestive works.—*Chicago Medical Times.*

An Important Aid to Students in the Study of Anatomy.

THREE CHARTS OF

The Nervo-Vascular System.

PART I.—THE NERVES.

PART II.—THE ARTERIES.

PART III.—THE VEINS.

ARRANGED BY W. HENRY PRICE, A.M., M.D., AND S. POTTS EAGLETON.

ENDORSED BY LEADING ANATOMISTS.

PRICE, IN THE UNITED STATES AND CANADA, 50 CENTS, NET, COMPLETE; GREAT BRITAIN, 2s. 6d. FRANCE, 3 fr. 60.

"THE NERVO-VASCULAR SYSTEM OF CHARTS" far Excels Every Other System in their Completeness, Compactness, and Accuracy.

Part I. The Nerves.—Gives in a clear form not only the Cranial and Spinal Nerves, showing the formation of the different Plexuses and their branches, but also the complete distribution of the SYMPATHETIC NERVES, thereby making it the most complete and concise chart of the Nervous System yet published.

Part II. The Arteries.—Gives a unique grouping of the Arterial System, showing the divisions and subdivisions of all the vessels, beginning from the heart and tracing their CONTINUOUS distribution to the periphery, and showing at a glance the terminal branches of each artery.

Part III. The Veins.—Shows how the blood from the periphery of the body is gradually collected by the larger veins, and these coalescing forming still larger vessels, until they finally trace themselves into the Right Auricle of the heart.

It is therefore readily seen that "The Nervo-Vascular System of Charts" offers the following superior advantages:—

1. It is the only arrangement which combines the Three Systems, and yet each is perfect and distinct in itself.

2. It is the only instance of the Cranial, Spinal, and Sympathetic Nervous Systems being represented on one chart.

3. From its neat size and clear type, and being printed only upon one side, it may be tacked up in any convenient place, and is always ready for freshening up the memory and reviewing for examination.

4. The nominal price for which these charts are sold places them within the reach of all.

For the student of anatomy there can possibly be no more concise way of acquiring a knowledge of the nerves, veins, and arteries of the human system. It presents at a glance their trunks and branches in the great divisions of the body. It will save a world of tedious reading, and will impress itself on the mind as no ordinary *vade mecum*, even, could. Its price is nominal and its value inestimable. No student should be without it.—*Pacific Record of Medicine and Surgery.*

We take pleasure in calling attention to these charts, as they are so arranged that a study of them will serve to impress them more indelibly on your mind than can be gained in any other way. They are also valuable for reference.—*Medical Brief.*

These are three admirably arranged charts for the use of students, to assist in memorizing their anatomical studies.—*Buffalo Med. and Surg. Jour.*

This is a series of charts of the nerves, arteries, and veins of the human body, giving names, origins, distributions, and functions, very convenient as memorizers and reminders. A similar series, prepared by the late J. H. Armsby, of Albany, N.Y., and framed, long found a place in the study of the writer, and on more than one occasion was the means of saving precious moments that must otherwise have been devoted to tumbling the pages of anatomical works.—*Med. Age.*

These three charts will be of great assistance to medical students. They can be hung on the wall and read across any ordinary room. The price is only fifty cents for the set.—*Practice.*

These charts have been carefully arranged, and will prove to be very convenient for ready reference. They are three in number, each constituting a part. . . . . It is a high recommendation that these charts have been examined and approved by John B. Deaver, M.D., Demonstrator of Anatomy in the University of Pennsylvania.—*Pacific Med. and Surg. Jour.* and *Western Lancet.*

(F. A. DAVIS, Medical Publisher Philadelphia, Pa., U.S.A.)

EVERY SANITARIAN SHOULD HAVE ROHÉ'S "TEXT-BOOK OF HYGIENE" AS A WORK OF REFERENCE.

SECOND EDITION.—IN PRESS.

TEXT-BOOK OF HYGIENE:

A COMPREHENSIVE TREATISE ON THE PRINCIPLES AND PRACTICE OF PREVENTIVE MEDICINE FROM AN AMERICAN STAND-POINT.

By GEORGE H. ROHÉ, M.D.,

Professor of Obstetrics and Hygiene in the College of Physicians and Surgeons, Baltimore; Director of the Maryland Maternité; Member of the American Public Health Association; Foreign Associate of the Société Française d'Hygiene, of the Société des Chevaliers-Sauveteurs des Alpes Maritimes, etc.

Net Price, in the United States, $2.50; in Canada (duty paid), $2.75; in Great Britain, 11s. 3d.; France, 16 fr. 20.

SECOND EDITION—THOROUGHLY REVISED AND LARGELY REWRITTEN, WITH MANY ILLUSTRATIONS AND VALUABLE TABLES. Rohé's Hygiene is the Standard Text-Book in many Medical Colleges in the United States and Canada. It is a sound guide to the most modern and approved practice in Applied Hygiene. **This New Edition will be issued early in the Spring of 1890,** in one handsome Octavo volume of about 400 pages, bound in Extra Cloth. Read what competent critics have said of the first edition of Rohé's "Text-Book of Hygiene":—

A storehouse of facts.—*British Medical Journal.*
Of invaluable assistance to the student.—*Sanitary News.*
This interesting and valuable book.—*Pacific Medical and Surgical Journal.*
Based upon sound principles and good practice.—*Philadelphia Medical Times.*
Full of important matter, told in a very interesting manner.—*Science.*
In harmony with the most recent advances in pathology.—*Medical Times and Gazette,* London.
Nothing better for the teacher, practitioner, or student.—*Mississippi Valley Medical Monthly.*
Contains a mass of information of the utmost importance.—*Independent Practitioner.*
Just the work needed by the medical student and the busy, active, sanitary officer.—*Southern Practitioner.*
This very useful work.—*American Jour. Med. Sciences.*
Comprehensive in scope, well condensed, clear in style, and abundantly supplied with references.—*Journal American Medical Association.*

—No. 4.—

The Neuroses of the Genito-Urinary System

IN THE MALE,

WITH STERILITY AND IMPOTENCE.

BY

DR. R. ULTZMANN,

PROFESSOR OF GENITO-URINARY DISEASES IN THE UNIVERSITY OF VIENNA.

TRANSLATED, WITH THE AUTHOR'S PERMISSION, BY

GARDNER W. ALLEN, M.D.,

SURGEON IN THE GENITO-URINARY DEPARTMENT BOSTON DISPENSARY.

Illustrated. 12mo. Handsomely Bound in Dark-Blue Cloth. Net Price, in the United States and Canada, $1.00, Post-paid; Great Britain, 4s. 6d.; France, 6 fr. 20.

This great work upon a subject which, notwithstanding the great strides that have been made in its investigation and the deep interest it possesses for all, is nevertheless still but imperfectly understood, has been translated in a most perfect manner, and preserves most fully the inherent excellence and fascinating style of its renowned and lamented author. Full and complete, yet terse and concise, it handles the subject with such a vigor of touch, such a clearness of detail and description, and such a directness to the result, that no medical man who once takes it up will be content to lay it down until its perusal is complete,—nor will one reading be enough.

Professor Ultzmann was recognized as one of the greatest authorities in his chosen specialty, and it is a little singular that so few of his writings have been translated into English. Those who have been so fortunate as to benefit by his instruction at the Vienna Polyclinic can testify to the soundness of his pathological teachings and the success of his methods of treatment. He approached the subject from a somewhat different point of view from most surgeons, and this gives a peculiar value to the work. It is believed, moreover, that there is no convenient hand-book in English treating in a broad manner the Genito-urinary Neuroses.

SYNOPSIS OF CONTENTS. FIRST PART.—I. Chemical Changes in the Urine in Cases of Neuroses. II. The Neuroses of the Urinary and of the Sexual Organs, classified as: 1, Sensory Neuroses; 2, Motor Neuroses; 3, Secretory Neuroses. SECOND PART.—Sterility and Impotence.

THE TREATMENT IN ALL CASES IS DESCRIBED CLEARLY AND MINUTELY.

HAY FEVER

—AND—

ITS SUCCESSFUL TREATMENT BY SUPERFICIAL ORGANIC ALTERATION OF THE NASAL MUCOUS MEMBRANE.

—BY—

CHARLES E. SAJOUS, M.D.,

Lecturer on Rhinology and Laryngology in Jefferson Medical College; Vice-President of the American Laryngological Association; Officer of the Academy of France and of Public Instruction of Venezuela; Corresponding Member of the Royal Society of Belgium, of the Medical Society of Warsaw (Poland), and of the Society of Hygiene of France; Member of the American Philosophical Society, etc., etc.

WITH 13 ENGRAVINGS ON WOOD. 12mo. BOUND IN CLOTH. BEVELED EDGES. PRICE, IN UNITED STATES AND CANADA, NET, $1.00; GREAT BRITAIN, 4s. 3d.; FRANCE, 6 fr. 20.

The object of this little work is to place in the hands of the general practitioner the means to treat successfully a disease which, until lately, was considered as incurable; its history, causes, pathology, and treatment are carefully described, and the latter is so arranged as to be practicable by any physician.

Dr. Sajous' volume must command the attention of those called upon to treat this heretofore intractable complaint.—*Medical and Surgical Reporter.*

Few have had the success in this disease which has so much baffled the average practitioner as Dr. Sajous, consequently his statements are almost authoritative. The book must be read to be appreciated.—*American Medical Digest.*

Dr. Sajous has admirably presented the subject, and, as this method of treatment is now generally recognized as efficient, we can recommend this book to all physicians who are called upon to treat this troublesome disorder.—*The Buffalo Medical and Surgical Journal.*

The symptoms, etiology, pathology, and treatment of Hay Fever are fully and ably discussed. The reader will not regret the expenditure of the small purchase price of this work if he has cases of the kind to treat.—*California Medical Journal.*

We are pleased with the author's views, and heartily commend his book to the consideration of the profession.—*The Southern Clinic.*

PHYSICIANS' AND STUDENTS' READY REFERENCE SERIES.

No. 1.

OBSTETRIC SYNOPSIS.

By JOHN S. STEWART, M.D.,

Demonstrator of Obstetrics and Chief Assistant in the Gynæcological Clinic of the Medico-Chirurgical College of Philadelphia.

WITH AN INTRODUCTORY NOTE BY

WILLIAM S. STEWART, A.M., M.D.,

Professor of Obstetrics and Gynæcology in the Medico-Chirurgical College of Philadelphia.

42 ILLUSTRATIONS. 202 PAGES. 12mo. HANDSOMELY BOUND IN DARK-BLUE CLOTH.

Price, Post-paid, in the United States and Canada, Net, $1.00; Great Britain, 4s. 3d.; France, 6 fr. 20.

By students this work will be found particularly useful. It is based upon the teachings of such well-known authors as Playfair, Parvin, Lush, Galabin, and Cazeaux and Tarnier, and, besides containing much new and important matter of great value to both student and practitioner, embraces in an Appendix the Obstetrical Nomenclature suggested by Professor Simpson, of Edinburgh, and adopted by the Obstetric Section of the Ninth International Medical Congress held in Washington, D.C., September, 1887.

It is well written, excellently illustrated, and fully up to date in every respect. Here we find all the essentials of Obstetrics in a nutshell, Anatomy, Embryology, Physiology, Pregnancy, Labor, Puerperal State, and Obstetric Operations all being carefully and accurately described.—*Buffalo Medical and Surgical Journal.*

It is clear and concise. The chapter on the development of the ovum is especially satisfactory. The judicious use of bold-faced type for headings, and italics for important statements, gives the book a pleasing typographical appearance.—*Medical Record.*

This volume is done with a masterly hand. The scheme is an excellent one. . . . The whole is freely and most admirably illustrated with well-drawn, new engravings, and the book is of a very convenient size.—*St. Louis Medical and Surgical Journal.*

DIPHTHERIA:

CROUP, TRACHEOTOMY, AND INTUBATION.

FROM THE FRENCH OF A. SANNÉ.

TRANSLATED AND ENLARGED BY

HENRY Z. GILL, M.D., LL.D.

	United States.	Canada (duty paid).	Great Britain.	France.
Net Price, Post-paid, Cloth, -	$4.00.	$4.40.	£0.18s.	24 fr. 60
" " Leather, -	5.00.	5.50.	1. 1s.	30 fr. 30

The above work, recently issued, is a translation from the French of SANNÉ's great work on "Diphtheria," by H. Z. GILL, late Professor of Surgery in Cleveland, Ohio.

SANNÉ's work is quoted, directly or indirectly, by every writer since its publication, as the highest authority, statistically, theoretically, and practically. The translator, having given special study to the subject for many years, has added over fifty pages, including the Surgical Anatomy, Intubation, and the recent progress in the branches treated down to the present date; making it, beyond question, the most complete work extant on the subject of Diphtheria in the English language.

Facing the title-page is found a very fine Colored Lithograph Plate of the parts concerned in Tracheotomy. Next follows an illustration of a cast of the entire Trachea, and bronchi to the third or fourth division, in one piece, taken from a photograph of a case in which the cast was expelled during life from a patient sixteen years old. This is the most complete cast of any one recorded.

Over fifty other illustrations of the surgical anatomy of instruments, etc., add to the practical value of the work.

Diphtheria having become such a prevalent, wide-spread, and fatal disease, no general practitioner can afford to be without this work. It will aid in preventive measures, stimulate promptness in the application of, and efficiency in, treatment, and moderate the extravagant views which have been entertained regarding certain specifics in the disease Diphtheria.

A full Index accompanies the enlarged volume, also a List of Authors, making altogether a very handsome illustrated volume of over 680 pages.

In this book we have a complete review and compendium of all worth preserving that has hitherto been said or written concerning diphtheria and the kindred subjects treated of by our author, collated, arranged, and commented on by both author and translator. The subject of intubation, so recently revived in this country, receives a very careful and impartial discussion at the hands of the translator, and a most valuable chapter on the prophylaxis of diphtheria and croup closes the volume.

His notes are frequent and full, displaying deep knowledge of the subject-matter. Altogether the book is one that is valuable and timely, and one that should be in the hands of every general practitioner.—*St. Louis Med. and Surgical Journal.*

Sanné's work is quoted, directly or indirectly, by many writers since its publication, as the highest authority, statistically, theoretically, and practically. The translator, having given special study to the subject for many years, has added over fifty pages, including the surgical anatomy, intubation, and the recent progress in the branches treated, down to the present date; making it, beyond question, the most complete work extant on the subject of diphtheria in the English language. Diphtheria having become such a prevalent, wide-spread, and fatal disease, no general practitioner can afford to be without this work. It will aid in preventive measures, stimulate promptness in application of, and efficiency in, treatment.—*Southern Practitioner.*

STANTON'S PRACTICAL AND SCIENTIFIC PHYSIOGNOMY;

OR

HOW TO READ FACES.

By MARY OLMSTED STANTON.

Copiously Illustrated. **Two Large Octavo Volumes.**

	United States.	Canada (duty paid).	Great Britain.	France.
Price, per Volume, Cloth,	$5.00	$5.50	£1.1s.	30 fr. 30
" " Sheep,	6.00	6.60	1.6s.	36 fr. 40
" " Half-Russia,	7.00	7.70	1.9s.	43 fr. 30

$1.00 DISCOUNT FOR CASH. Sold only by Subscription, or sent direct on receipt of price, shipping expenses prepaid.

The author, Mrs. Mary O. Stanton, has given over twenty years to the preparation of this work. Her style is easy, and, by her happy method of illustration of every point, the book reads like a novel, and memorizes itself. To physicians the diagnostic information conveyed is invaluable. To the general reader each page opens a new train of ideas. (This book has no reference whatever to Phrenology.)

IMPORTANT ANNOUNCEMENT.

A TREATISE

—ON—

Materia Medica, Pharmacology, & Therapeutics.

BY

JOHN V. SHOEMAKER, A.M., M.D.,

Professor of Materia Medica, Pharmacology, and Therapeutics in the Medico-Chirurgical College of Philadelphia, and Member American Medical Association,

AND

JOHN AULDE, M.D.,

Demonstrator of Clinical Medicine and of Physical Diagnosis in the Medico-Chirurgical College of Philadelphia, and Member American Medical Association.

IN TWO HANDSOME ROYAL OCTAVO VOLUMES.

NET PRICES, per Volume, in United States: Cloth, $2.50; Sheep, $3.25. In Canada (duty paid): Cloth, $2.75; Sheep, $3.55. In Great Britain: Cloth, 11s. 3d.; Sheep, 14s. 6d. In France: Cloth, 16 fr. 20; Sheep, 20 fr. 20.

THE Publisher takes pleasure in announcing that VOLUME I of this eagerly-looked-for work is NOW READY, and that the utmost diligence will be exercised in filling with the greatest rapidity, and in regular order of receipt, the numerous orders now awaiting its publication.

The general plan of the work embraces three parts, each of which is practically independent of the other, as will be understood from the accompanying analysis, and of which Parts I and II are contained in the volume now announced; this, however, is not the only advantage accruing from the preparation of the work in two volumes. Each volume will thus be much smaller and more convenient to handle, while some may wish to secure a particular portion of the work, and to them the cost is lessened.

Several blank sheets of closely-ruled letter-paper are inserted at convenient places in the work, thus rendering it available for the student and physician to add valuable notes concerning new remedies and other important matters.

PART I embraces three subdivisions, as follow:—

First. A brief synopsis upon the subject of pharmacy, in which is given a clear and concise description of the operations and preparations taken into account by the physician when prescribing medicines, together with some practical suggestions regarding the most desirable methods for securing efficiency and palatability.

Second. A Classification of Medicines is presented under the head of "General Pharmacology and Therapeutics," with a view to indicate more especially the methods by which the economy is affected. Thus, there are Internal and External Remedies, and, besides, a class termed Chemical Agents, including Antidotes, Disinfectants, and Antiseptics, and an explanatory note is appended to each group, as in the case of Alteratives, Antipyretics, Antispasmodics, Purgatives, etc.

Third. A Summary has been prepared upon Therapeutics, covering methods of Administration, Absorption and Elimination, Incompatibility, Prescription-writing, and Dietary for the Sick, this section of the work embracing nearly one hundred and fifty pages.

PART II is devoted to "Remedies and Remedial Agents Not Properly Classed with Drugs," and includes elaborate articles upon the following topics: Electro-Therapy, Hydro-Therapy, Masso-Therapy, Heat and Cold, Oxygen, Mineral-Waters, and, in addition thereto, other subjects, perhaps of less significance to the practitioner, such as Climatology, Hypnotism and Suggestion, Metallo-Therapy, Transfusion, and Baunscheidtismus, have received a due share of attention. This section of the work embraces over two hundred pages, and will be found especially valuable to the student and recent graduate, as these articles are fully abreast of the times.

VOLUME II, which is Part III of the work, is wholly taken up with the consideration of drugs, each remedy being studied from three points of view, viz., the Preparations, or Materia Medica; the Physiology and Toxicology, or Pharmacology, and, lastly, its Therapy. IT WILL BE READY ABOUT MAY 1, 1890.

The typography of the work will be found clean, sharp, and easily read without injury to the visual organs, and the bold-face type interspersed throughout the text makes the different subjects discussed quick of reference. The paper and binding will also be up to the standard, and nothing will be left undone to make the work first-class in every particular.

JUST PUBLISHED.

THE PHYSIOLOGY OF THE DOMESTIC ANIMALS.

A TEXT-BOOK FOR VETERINARY AND MEDICAL STUDENTS AND PRACTITIONERS.

—BY—

ROBERT MEADE SMITH, A.M., M.D.,

Professor of Comparative Physiology in University of Pennsylvania; Fellow of the College of Physicians and Academy of the Natural Sciences, Philadelphia; of the American Physiological Society; of the American Society of Naturalists; Associé Etranger de la Société Française D'Hygiene, etc.

FIG. 117.—PAROTID AND SUBMAXILLARY FISTULÆ IN THE HORSE, AFTER COLIN. (*Thanhoffer and Tormay.*)

K, K', rubber bulbs for collecting saliva; *cs*, cannula in the parotid duct.

In One Handsome Royal Octavo Volume of over 950 Pages, Profusely Illustrated with more than 400 Fine Wood-Engravings and many Colored Plates.

	United States.	Canada (duty paid).	Great Britain.	France.
NET PRICES, CLOTH, ...	*$5.00*	*$5.50*	*£1.*	*30 fr. 30.*
" " SHEEP, ...	*6.00*	*6.60*	*1.6.*	*36 fr. 20.*

THIS new and important work, the most thoroughly complete in the English language on this subject, has just been issued. In it the physiology of the domestic animals is treated in a most comprehensive manner, especial prominence being given to the subject of foods and fodders, and the character of the diet for the herbivora under different conditions, with a full consideration of their digestive peculiarities. Without being overburdened with details, it forms a complete text-book of physiology, adapted to the use of students and practitioners of both veterinary and human medicine. *This work has already been adopted as the Text-Book on Physiology in the Veterinary Colleges of the United States, Great Britain, and Canada.*

The work throughout is well balanced. Broad, though not encyclopædic, concise without sacrificing clearness, it combines the essentials of a successful text-book. It is eminently modern, and, although first in the field, is of such grade of excellence that successors must reach a high standard before they become competitors.—*Annals of Surgery.*

Dr. Smith has conferred a great benefit upon the veterinary profession by his contribution to their use of a work of immense value, and has provided the American veterinary student with the only means by which he can become properly familiar with the physiology of our domestic animals. Veterinary practitioners and graduates will read it with pleasure. Veterinary students will readily acquire needed knowledge from its pages, and veterinary schools which would be well equipped for the work they aim to perform cannot ignore it as their text-book in physiology.—*American Veterinary Review.*

Dr. Smith's presentment of his subject is as brief as the status of the science permits, and to this much-desired conciseness he has added an equally welcome clearness of statement. The illustrations in the work are exceedingly good, and must prove a valuable aid to the full understanding of the text.—*Journal of Comparative Medicine and Surgery.*

We have examined the work in a great many particulars, and find the views so correct, where we have had the means of comparison of statements with those of some recognized authority, that we will be compelled hereafter to look to this work as the text-book on physiology of animals. The book will prove of incalculable benefit to veterinarians wherever they may be found; and to the country physician, who is often called upon to attend to sick animals as well as human beings, we would say, lose no time in getting this work and let him familiarize himself with the facts it contains.—*Virginia Medical Monthly.*

Altogether, Professor Smith's "Physiology of the Domestic Animals" is a happy production, and will be hailed with delight in both the human medical and veterinary medical worlds. It should find its place besides in all agricultural libraries.—PAUL PAQUIN, M.D., V.S., in the *Weekly Medical Review.*

It may be said that it supplies to the veterinary student the place in physiology that Chauveau's incomparable work—"The Comparative Anatomy of the Domesticated Animals"—occupies in anatomy. Higher praise than this it is not possible to bestow. And since it is true that the same laws of physiology which are applicable to the vital process of the domestic animals are also applicable to man, a perusal of this carefully written book will repay the medical student or practitioner.—*Canadian Practitioner.*

The work before us fills the hiatus of which complaint has so often been made, and gives in the compass of less than a thousand pages a very full and complete account of the functions of the body in both carnivora and herbivora. The author has judiciously made the nutritive functions the strong point of the work, and has devoted special attention to the subject of foods and digestion. In looking through the other sections of the work, it appears to us that a just proportion of space is assigned to each, in view of their relative importance to the practitioner. Thus, while the subject of reproduction is dismissed in a few pages, a chapter of considerable length is devoted to locomotion, and especially to the gaits of the horse.—*London Lancet.*

This is almost the only work of the kind in the English language, and it so fully covers every detail of general and special physiology that there is no room for any rival. The excellence of typographical work, and the wealth, beauty, and clearness of the illustrations, correspond with the thoroughness and clearness of the treatise.—*Albany Medical Annals.*

It is not often that the medical profession has the opportunity of reading a new book upon a new subject, and doubtless English-speaking physicians will feel grateful to Professor Smith for his admirable and pioneer work in a branch of medical science upon which a great amount of ignorance prevails. . . . The last portion of the work is devoted to the reproductive functions, and contains much valuable information upon a portion of animal physiology concerning which many are ignorant. The book is a valuable one in every way, and will be consulted largely by veterinary and medical students and practitioners.—*Buffalo Medical and Surgical Journal.*

The appearance of this work is most opportune. It will be much appreciated, as tending to secure the thorough comprehension of function in the domesticated animals, and, in consequence, their general well-being—a matter of world-wide importance. With a thorough sense of gratification we have perused its pages: throughout we find clear expression, clear reasoning, and that patient accumulation of facts so valuable in a text-book for students.—*British Medical Journal.*

For notice this time, I take up the volume on the "Physiology of the Domestic Animals," by Dr. R. Meade Smith, a volume of 938 pages, closely printed, and dealing with its subject in a manner sufficiently exhaustive to insure its place as a text-book for fifteen years at the very least. Its learning is only equaled by its industry, and its industry by the consistency and skill with which its varied parts are brought together into harmonious, lucid, and intellectual unity.—DR. BENJAMIN WARD RICHARDSON, in the *London Asclepiad.*

THE

International Pocket Medical Formulary,

ARRANGED THERAPEUTICALLY.

BY C. SUMNER WITHERSTINE, M.S., M.D.,

Associate Editor of the "Annual of the Universal Medical Sciences;" Visiting Physician of the Home for the Aged, Germantown, Philadelphia; Late House-Surgeon Charity Hospital, New York.

More than 1800 Formulæ from Several Hundred Well-Known Authorities.

With an APPENDIX containing a Posological Table, the newer remedies included; Important Incompatibles; Tables on Dentition and the Pulse; Table of Drops in a Fluidrachm and Doses of Laudanum graduated for age; Formulæ and Doses of Hypodermic Medication, including the newer remedies; Uses of the Hypodermic Syringe; Formulæ and Doses for Inhalations, Nasal Douches, Gargles, and Eye-washes; Formulæ for Suppositories; Use of the Thermometer in Disease; Poisons, Antidotes, and Treatment; Directions for Post-Mortem and Medico-Legal Examinations; Treatment of Asphyxia, Sun-stroke, etc.: Anti-emetic Remedies and Disinfectants; Obstetrical Table; Directions for Ligation of Arteries; Urinary Analysis; Table of Eruptive Fevers: Motor Points for Electrical Treatment, etc., etc.

This work, the best and most complete of its kind, contains about **275 printed pages, besides extra blank leaves.** Elegantly printed, with red lines, edges, and borders; with illustrations. **Bound in leather, with side flap.** It contains more than **1800 Formulæ**, exclusive of the large amount of other very valuable matter.

Price, Post-paid, in the United States and Canada, $2.00, net; Great Britain, 8s. 6d.; France, 12 fr. 40.

TEN REASONS *WHY EVERY MEDICAL MAN SHOULD POSSESS A COPY OF THE INTERNATIONAL POCKET MEDICAL FORMULARY.*

1. Because it is a handy book of reference, replete with the choicest formulæ (over 1800 in number) of more than six hundred of the most prominent classical writers and modern practitioners.
2. Because the remedies given are not only those whose efficiency has stood the test of time, but also the newest and latest discoveries in pharmacy and medical science, as prescribed and used by the best-known American and foreign modern authorities.
3. Because it contains the latest, largest (66 formulæ) and most complete collection of hypodermic formulæ (including the latest new remedies) ever published, with doses and directions for their use in over fifty different diseases and diseased conditions.
4. Because its appendix is brimful of information, invaluable in office work, emergency cases, and the daily routine of practice.
5. Because it is a reliable friend to consult when, in a perplexing or obstinate case, the usual line of treatment is of no avail. (A hint or a help from the best authorities, as to choice of remedies, correct dosage, and the eligible, elegant, and most palatable mode of exhibition of the same.)
6. Because it is compact, elegantly printed and bound, well illustrated, and of convenient size and shape for the pocket.
7. Because the alphabetical arrangement of the diseases and a thumb-letter index render reference rapid and easy.
8. Because blank leaves, judiciously distributed throughout the book, afford a place to record and index favorite formulæ.
9. Because, as a *student*, he needs it for study, collateral reading, and for recording the favorite prescriptions of his professors, in lecture and clinic; as a *recent graduate*, he needs it as a reference hand-book for daily use in prescribing (gargles, nasal douches, inhalations, eye-washes, suppositories, incompatibles, poisons, etc.); as an *old practitioner*, he needs it to refresh his memory on old remedies and combinations, and for information concerning newer remedies and more modern approved plans of treatment.
10. Because no live, progressive medical man can afford to be without it.

It is sometimes important that such prescriptions as have been well established in their usefulness be preserved for reference, and this little volume serves such a purpose better than any other we have seen.—*Columbus Medical Journal.*

Without doubt this book is the best one of its class that we have ever seen. . . . . The printing, binding, and general appearance of the volume are beyond praise.—*University Medical Magazine.*

It may be possible to get more crystallized knowledge in an equally small space, but it does not seem probable.—*Medical Classics.*

A very handy and valuable book of formulæ for the physician's pocket.—*St. Louis Medical and Surg. Journal.*

This little pocket-book contains an immense number of prescriptions taken from high authorities in this and other countries.—*Northwestern Lancet.*

This one is the most complete as well as the most conveniently arranged of any that have come under our attention. The diseases are enumerated in alphabetical order, and for each the latest and most approved remedies from the ablest authorities are prescribed. The book is indexed entirely through after the order of the first pages of a ledger, the index letter being printed on morocco leather and thereby made very durable.—*Pacific Medical Journal.*

It is a book desirable for the old practitioner and for his younger brothers as well.—*St. Joseph Medical Herald.*

As long as "combinations" are sought such a book will be of value, especially to those who cannot spare the time required to learn enough of incompatibilities before commencing practice to avoid writing incompatible and dangerous prescriptions. The constant use of such a book by such prescribers would save the pharmacist much anxiety.—*The Druggists' Circular.*

In judicious selection, in accurate nomenclature, in arrangement, and in style it leaves nothing to be desired. The editor and the publisher are to be congratulated on the production of the very best book of its class.—*Pittsburgh Medical Review.*

One must see it to realize how much information can be got into a work of so little bulk.—*Canada Medical Record.*

To the young physician just starting out in practice this little book will prove an acceptable companion.—*Omaha Clinic.*

The want of to-day is crystallized knowledge. This neat little volume contains in it the most accessible form. It is bound in morocco in pocket form, with alphabetical divisions of diseases, so that it is possible to turn instantly to the remedy, whatever may be the disorder or wherever the patient may be situated. . . . . To the physician it is invaluable, and others should not be without it. We heartily commend the work to our readers.—*Minnesota Medical Journal.*

JUST ISSUED.

PHYSICIANS' AND STUDENTS' READY-REFERENCE SERIES.

—No. 3.—

Synopsis of Human Anatomy:

Being a Complete Compend of Anatomy, including the Anatomy of the Viscera, and Numerous Tables.

BY

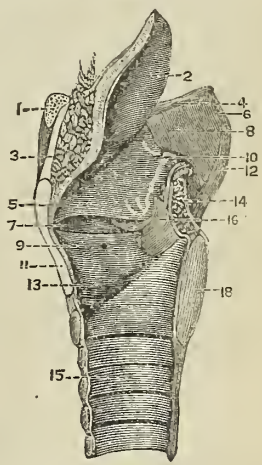
JAMES K. YOUNG, M.D.,

Instructor in Orthopædic Surgery and Assistant Demonstrator of Surgery, University of Pennsylvania; Attending Orthopædic Surgeon, Out-Patient Department, University Hospital, etc.

ILLUSTRATED WITH 76 WOOD-ENGRAVINGS. 390 PAGES.
12mo. HANDSOMELY BOUND IN DARK-BLUE CLOTH.

Price, Post-paid, in the United States and Canada, $1.40, net; Great Britain, 6s. 6d.; France, 9 fr. 25.

While the author has prepared this work especially for students, sufficient descriptive matter has been added to render it extremely valuable to the busy practitioner, particularly the sections on the Viscera, Special Senses, and Surgical Anatomy.



The work includes a complete account of Osteology, Articulations and Ligaments, Muscles, Fascias, Vascular and Nervous Systems, Alimentary, Vocal, and Respiratory and Genito-Urinary Apparatuses, the Organs of Special Sense, and Surgical Anatomy.

In addition to a most carefully and accurately prepared text, wherever possible, the value of the work has been enhanced by tables to facilitate and minimize the labor of students in acquiring a thorough knowledge of this important subject. The section on the teeth has also been especially prepared to meet the requirements of students of Dentistry.

In its preparation, Gray's Anatomy [last edition], edited by Keen, being the anatomical work most used, has been taken as the standard.

Anatomy is a theme that allows such concentration better than most medical subjects, and, as the accuracy of this little book is beyond question, its value is assured. As a companion to the dissecting-table, and a convenient reference for the practitioner, it has a definite field of usefulness.—*Pittsburgh Medical Review.*

This is a very carefully prepared compend of anatomy, and will be useful to students for college or hospital examination. There are some excellent tables in the work, particularly the one showing the origin, course, distribution, and functions of the cranial nerves.—*Medical Record.*

Dr. Young has compiled a very useful book. We are not inclined to approve of compends as a general rule, but it certainly serves a good purpose to have the subject of anatomy presented in a compact, reliable way, and in a book easily carried to the dissecting-room. This the author has done. The book is well printed, and the illustrations well selected. If a student can indulge in more than one work on anatomy,—for, of course, he must have a general treatise on the subject,—he can hardly do better than to purchase this compend It will save the larger work, and can always be with him during the hours of dissection.—*Buffalo Medical and Surgical Journal.*

Excellent tables have been arranged, which tersely and clearly present important anatomical facts, and the book will be found very convenient for ready reference.—*Columbus Medical Journal.*

The book is much more satisfactory than the "remembrances" in vogue, and yet is not too cumbersome to be carried around and read at odd moments—a property which the student will readily appreciate.—*Weekly Medical Review.*

If a synopsis of human anatomy may serve a purpose, and we believe it does, it is very important that the synopsis should be a good one. In this respect the above work may be recommended as a reliable guide. Dr. Young has shown excellent judgment in his selection of illustrations, in the numerous tables, and in the classification of the various subjects.—*Therapeutic Gazette.*

Every unnecessary word has been excluded, out of regard to the very limited time at the medical student's disposal. It is also good as a reference book, as it presents the facts about which he wishes to refresh his memory in the briefest manner consistent with clearness.—*New York Medical Journal.*

It is certainly concise and accurate, and should be in the hands of every student and practitioner.—*The Medical Brief.*

ANNUAL
OF THE
Universal Medical Sciences.

A YEARLY REPORT OF THE PROGRESS OF THE GENERAL SANITARY SCIENCES THROUGHOUT THE WORLD.

Edited by CHARLES E. SAJOUS, M.D.,

LECTURER ON LARYNGOLOGY AND RHINOLOGY IN JEFFERSON MEDICAL COLLEGE, PHILADELPHIA, ETC.,

AND

SEVENTY ASSOCIATE EDITORS,

Assisted by over TWO HUNDRED Corresponding Editors and Collaborators.

In Five Royal Octavo Volumes of about 500 pages each, bound in Cloth and Half-Russia, Magnificently Illustrated with Chromo-Lithographs, Engravings, Maps, Charts, and Diagrams.

BEING INTENDED

1st. To assist the busy practitioner in his efforts to keep abreast of the rapid strides of all the branches of his profession.

2d. To avoid for him the loss of time involved in searching for that which is new in the profuse and constantly increasing medical literature of our day.

3d. To enable him to obtain the greatest possible benefit of the limited time he is able to devote to reading, by furnishing him with new matter ONLY.

4th. To keep him informed of the work done by ALL nations, including many otherwise seldom if ever heard from.

5th. To furnish him with a review of all the new matter contained in the periodicals to which he cannot (through their immense number) subscribe.

6th. To cull for the specialist all that is of a progressive nature in the general and special publications of all nations, and obtain for him special reports from countries in which such publications do not exist, and

Lastly, to enable any physician to possess, at a moderate cost, a complete

CONTEMPORARY HISTORY OF UNIVERSAL MEDICINE,

edited by many of America's ablest teachers, and superior in every detail, of print, paper, binding, etc., etc., a befitting continuation of such great works as "Pepper's System of Medicine," "Ashhurst's International Encyclopædia of Surgery," "Buck's Reference Hand-Book of the Medical Sciences," etc., etc.

EDITORIAL STAFF of the ANNUAL of the UNIVERSAL MEDICAL SCIENCES.

ISSUE OF 1888.

EXTRACTS FROM REVIEWS.

We venture to say that all who saw the ANNUAL as it appeared in 1888 were on the lookout for its reappearance this (1889) year; but there are many whose knowledge of this magnificent undertaking will date with this present issue, and to those a mere examination of the work will suffice to show that it fills a legitimate place in the evolution of knowledge, for it does what no single individual is capable of doing.

These volumes make readily available to the busy practitioner the best fruits of medical progress for the year, selected by able editors from the current literature of the world; such a work cannot be overlooked by anyone who would keep abreast of the times. With so much that is worthy of notice incorporated in one work, and each department written up with a minuteness and thoroughness appreciated particularly by the specialist, it would avail nothing to cite particular instances of progress. Let it be sufficient to say, however, that while formerly there was a possible excuse for not having the latest information on matters pertaining to the medical sciences, there can no longer be such an excuse while the ANNUAL is published.—*Journal of the American Medical Association.*

We have before us the second issue of this ANNUAL, and it is not speaking too strongly when we say that the series of five volumes of which it consists forms a most important and valuable addition to medical literature.

Great discretion and knowledge of the subjects treated of are required at the hands of those who have taken charge of the various sections, and the manner in which the gentlemen who were chosen to fill the important posts of sub-editors have acquitted themselves fully justifies the choice made. We know of no branch of the profession to which this ANNUAL could fail to be useful. Dr. Sajous deserves the thanks of the whole profession for his successful attempt to facilitate the advance of medical literature and practice.—*London Lancet.*

This very valuable yearly report of the progress of medicine and its collateral sciences throughout the world is a work of very great magnitude and high importance. It is edited by Dr. C. E. Sajous, assisted, it is stated, by seventy associate editors, whose names are given, making up a learned and most weighty list. Their joint labors have combined to produce a series of volumes in which the current progress throughout the world, in respect to all the branches of medical science, is very adequately represented. The general arrangements of the book are ingenious and complete, having regard to thoroughness and to facility of bibliographical reference.—*British Medical Journal.*

ANNUAL, 1890.

The editor and publishers of the ANNUAL OF THE UNIVERSAL MEDICAL SCIENCES take this opportunity to thank its numerous friends and patrons for the liberal support accorded it in the past, and to announce its publication, as usual, in 1890. Recording, as it does, the progress of the world in medicine and surgery, its motto continues to be, as in the past, "Improvement," and its friends may rest assured that no effort will be spared, not only to maintain, but to surpass, the high standard of excellence already attained.

The Subscription Price will be the same as last year's issue and the issue of 1888.

ISSUE OF 1889

OF

The Annual of the Universal Medical Sciences.

In Five Royal Octavo Volumes of over 500 pages each, bound in Cloth and Half-Russia, Magnificently Illustrated with Chromo-Lithographs, Engravings, Maps, Charts, and Diagrams.

THE LATEST BOOK OF REFERENCE ON NERVOUS DISEASES.

Lectures on Nervous Diseases,

FROM THE STAND-POINT OF CEREBRAL AND SPINAL LOCALIZATION, AND THE LATER METHODS EMPLOYED IN THE DIAGNOSIS AND TREATMENT OF THESE AFFECTIONS.

BY AMBROSE L. RANNEY, A.M., M.D.,

Professor of the Anatomy and Physiology of the Nervous System in the New York Post-Graduate Medical School and Hospital; Professor of Nervous and Mental Diseases in the Medical Department of the University of Vermont, etc.; Author of "The Applied Anatomy of the Nervous System," "Practical Medical Anatomy," etc., etc.

PROFUSELY ILLUSTRATED

With Original Diagrams and Sketches in Color by the Author, carefully selected Wood-Engravings, and Reproduced Photographs of Typical Cases.

ONE HANDSOME ROYAL OCTAVO VOLUME OF 780 PAGES.

	United States.	Canada (duty paid).	Great Britain.	France.
CLOTH,	**$5.50**	**$6.05**	**£1.3s.**	**34 fr. 70**
SHEEP,	**6.50**	**7.15**	**1.6s.**	**40 fr. 45**
HALF-RUSSIA,	**7.00**	**7.70**	**1.9s.**	**43 fr. 30**

SOLD ONLY BY SUBSCRIPTION.

It is now generally conceded that the nervous system controls all of the physical functions to a greater or less extent, and also that most of the symptoms encountered at the bedside can be explained and interpreted from the stand-point of nervous physiology.

The unprecedented sale of this work during the short period which has elapsed since its publication has already compelled the publishers to print a second edition, which is already nearly exhausted.

We are glad to note that Dr. Ranney has published in book form his admirable lectures on nervous diseases. His book contains over seven hundred large pages, and is profusely illustrated with original diagrams and sketches in colors, and with many carefully selected wood-cuts and reproduced photographs of typical cases. A large amount of valuable information, not a little of which has but recently appeared in medical literature, is presented in compact form, and thus made easily accessible. In our opinion, Dr. Ranney's book ought to meet with a cordial reception at the hands of the medical profession, for, even though the author's views may be sometimes open to question, it cannot be disputed that his work bears evidence of scientific method and honest opinion.—*American Journal of Insanity.*

LECTURES
ON THE
Diseases of the Nose and Throat.

DELIVERED AT THE JEFFERSON MEDICAL COLLEGE, PHILADELPHIA,

BY CHARLES E. SAJOUS, M.D.,

Lecturer on Rhinology and Laryngology in Jefferson Medical College; Vice-President of the American Laryngological Association; Officer of the Academy of France and of Public Instruction of Venezuela; Corresponding Member of the Royal Society of Belgium, of the Medical Society of Warsaw (Poland), and of the Society of Hygiene of France; Member of the American Philosophical Society, etc., etc.

ILLUSTRATED WITH 100 CHROMO-LITHOGRAPHS, FROM OIL PAINTINGS BY THE AUTHOR, AND 93 ENGRAVINGS ON WOOD.

ONE HANDSOME ROYAL OCTAVO VOLUME. SOLD ONLY BY SUBSCRIPTION.

	United States.	Canada (duty paid).	Great Britain.	France.
Cloth, Royal Octavo,	**$4.00**	**$4.40**	**£0.18s.**	**24 fr. 60**
Half-Russia, Royal Octavo,	**5.00**	**5.50**	**1. 1s.**	**30 fr. 30**

☞ *Since the publisher brought this valuable work before the profession, it has become: 1st, the text-book of a large number of colleges; 2d, the reference-book of the U. S. Army, Navy, and the Marine Service; and, 3d, an important and valued addition to the libraries of over 7000 physicians.*

This book has not only the inherent merit of presenting a clear *exposé* of the subject, but it is written with a view to enable the general practitioner to treat his cases himself. To facilitate diagnosis, *colored plates* are introduced, showing the appearance of the different parts in the diseased state as they appear in nature by artificial light. No error can thus be made, as each affection of the nose and throat has its representative in the *100 chromo-lithographs* presented. In the matter of treatment, the indications are so complete that even the slightest procedures, folding of cotton for the forceps, the use of the probe, etc., are clearly explained.

It is intended to furnish the general practitioner not only with a guide for the treatment of diseases of the nose and throat, but also to place before him a representation of the normal and diseased parts as they would appear to him were they seen in the living subject. As a guide to the treatment of the nose and throat, we can cordially recommend this work.—*Boston Medical and Surgical Journal.*

Ointments and Oleates in Diseases of the Skin.

—BY—

JOHN V. SHOEMAKER, A.M., M.D.,

Professor of Materia Medica, Pharmacology, Therapeutics, and Clinical Medicine, and Clinical Professor of Diseases of the Skin in the Medico-Chirurgical College of Philadelphia, etc.

16mo. NEATLY BOUND IN CLOTH. PRICE, IN UNITED STATES AND CANADA, NET, $1.00, POST-PAID; GREAT BRITAIN, 4s. 3d.; FRANCE, 6 fr. 20.

The accompanying Table of Contents will give a general idea of the work:

CONTENTS. PART I.—HISTORY AND ORIGIN. PART II.—PROCESS OF MANUFACTURE. PART III.—PHYSIOLOGICAL ACTION OF THE OLEATES. PART IV.—THERAPEUTIC EFFECT OF THE OLEATES. PART V.—OINTMENTS: Local Medication of Skin Diseases.—Antiquity of Ointments.—Different Indications for Ointments, Powders, Lotions, etc.—Information about Ointments: Scanty, Scattered, and Insufficient —Fats and Oils: Animal and Vegetable.—Their Chemical Composition.—Comparative Permeability of Oils into Skin; of Animal, of Vegetable. Incorporation of Medicinal Substances into Fats: (1) Mode of Preparation, (2) Vegetable Powders and Extracts, (3) Alkaloids, (4) Mineral Substances, (5) Petroleum Fats; Chemical Composition: Uses and Disadvantages.—List of Officinal Ointments.—Indications.—Substances often Prescribed Extemporaneously in Ointment Form.—Indications.

A FULL INDEX RENDERS THE BOOK CONVENIENT FOR QUICK REFERENCE.

CRITICISMS OF FIRST EDITION.

The profession in both countries is deeply indebted to Dr. Shoemaker for his excellent work in this department of medicine.—*William Whitla, M.D. (Q. U. I.).*

It is the most complete exposition of their action which has yet appeared. They are very valuable accessions to the materia medica, and should be familiar to every practitioner.—*Medical and Surgical Reporter.*

To those of our readers who wish to learn the therapeutic effects of a class of preparations which are destined to grow in favor as their merits become more generally known, we commend the book.—*Journal of Cutaneous and Venereal Diseases.*

No physician pretending to treat skin diseases should be without a copy of this very instructive little book.—*Canada Medical Record.*
